On Monday February 16, the Norfolk County Tuberculosis unit will be here to administer the tuberculin test to all students, wives, and children at Babson. This test is being sponsored by the Babson Veterans' Club, and is free of charge.

The response to this testing program to date has been very slow. The purpose behind this worthy undertaking is not to benefit the Vet's Club but to offer every student the chance to be free of a free examination, to detect any disease that has contacted your B. germs. Medical authorities stress the fact that this test should be taken every three months for anyone who is in direct contact with large groups of people.

SAGE SAYS TO DELTA SIGMA PI
"If you have boyhood ambition, don't give it up; it can come true." These words come from one whose dream came true.

On Wednesday evening, February 4, Babson's Delta Sigma Pi was honored to have as its guest speaker, George M. Sage, '33, who has been in charge of the Advertising Department of Management has announced the acceptance of the following faculty five who are men as classified under the category of Babson, George Sage decided he would be personally present at the actual operation of the Point.

THE BLUE KEY STORY, IV

PAST ACTIVITIES

Many of the activities once carried out by Blue Key, are now done by other campus organizations. By the same token, Blue Key has accepted new tasks to be carried out for the betterment of the community and the student body of Babson. Some of the projects and activities that Blue Key has been responsible for in the past are:

- Freshmen class organization, sale of the official Babson pin, chairing the project for recording talking records for blind students, collection of funds for the United States flag, publication of the college bimonthly.

- Two babson undergraduate, now graduates, Fred Stedman and George.{Continued on page 4}

- Activities that Blue Key has participated in and are still active in. These are included under our present activities.

PRESENT ACTIVITIES

At the present time Blue Key is engaged in the following services on the Babson campus:

- Conducting the Student Government elections, conducting the class officers elections, usual in all-school assemblies held at Knight Auditorium, coordinating the Mayoralty campaign and conducting the elections for the Mayor, conducting the sale of the Official Babson pin, chairing the project for recording talking records for blind students, collection of funds for the United States flag, publication of the college bimonthly.

- Two babson undergraduate, now graduates, Fred Stedman and George.(Continued on page 2)

- The time taken to administer the test is less than 15 seconds. The time taken to read the test is less than 5 seconds. It takes 20 seconds of your time too much to ask, especially if your TOUR LIFE, which is in question?

- Testing will begin at 12:30 P.M. in the Cup 'n Saucer, and will continue until 3:00 P.M. Reading of the test will be Thursday at the same place and time.

- If you haven't completed a form, you can acquire one from any switchboard or Adams' office. Upon completion of the form, they may be read and turned in to the switchboard officer, Adams' office, Charles Berry or John Bogardus.

- S.A.M. ELECTS 25

- The Babson chapter of the Student Government of Management has announced the acceptance of the following faculty five who are men as classified under the category of Babson, George Sage decided he would be personally present at the actual operation of the Point.

- The new members include:
  - Donald Burke, Donald Burke, George Bienfang, Philip Bol- First, was the Bicycle Race. This is to be held Saturday morning from 11:00 to 12:00 on the 21st. The race will start in front of Lyons Hall and continue around the island in front of Park Manor and then back to Lyons. It will be a four-man relay race and points will be awarded toward the Punch Bowl: 25-1st; 10-2nd; 5-3rd; 1-4th. Each team has a bicycle. A good one is worth as much as a second team member, and this is a good cause for some of the teams to catch up. The winning team will be present ed with a traditional "potty" Assembly Hears Makers

- Two babson alumni, John Sanderson and Douglas Wat son, lectured on opportunity in manufacturing as a part of the job counseling series sponsored by S.A.M. and the place ment office.

- Mr. Watson emphasized the importance of looking toward industry for job opportunities since 90 per cent of the Ameri can work force is employed by industry. There are two broad categories of jobs in industry: line and staff.

- STAFF OR LINE

- The majority of young men entering the line function will start as assistant foremen after a training period. From that position, the trainee may progress into that of foreman, plant superintendent, production manager, plant manager, divisional director, and finally, Vice President in charge of Manufacturing.

CONTROVERSY OVER FEDERAL LOANS

Controversy over the National Defense Education Act commenced at its inception several months ago and secured to have reached its apex last week when the government announced the distribution of Federal student loans to American colleges throughout the nation, for the purpose of a national student loan plan. Babson's allotment by the government 'talks about.'

CONTROVERSY

The first controversial situation arose when several mem bers Bryn Mawr, Havercord, Swarthmore, Bates, Bowdoin and Tufts, decided not to take part in the program unless an amendment is passed to repeal a provision in the act which requires a two and pay loyalty oath. Under the act, which was adopted last year, students receiving loans must sign an oath of allegiance to the United States and a second somewhat redundant oath, both of which claim belief in or support of groups advocating the overthrow of the government by force and violence.

LOW INVESTMENT

Mr. Sage said that the com munity's interest in the allocation of student loans is free of charge. Perry, Jerry Rice, Michael the Punch Bowl: 2.5-lst; 16-tie one could leave the dorm party overthrow of the government.

BRIGHTON

The Babson chapter of the Student Government of Management has announced the acceptance of the following faculty five who are men as classified under the category of Babson, George Sage decided he would be personally present at the actual operation of the Point.

- The new members include:
  - Donald Burke, Donald Burke, George Bienfang, Philip Bol- First, was the Bicycle Race. This is to be held Saturday morning from 11:00 to 12:00 on the 21st. The race will start in front of Lyons Hall and continue around the island in front of Park Manor and then back to Lyons. It will be a four-man relay race and points will be awarded toward the Punch Bowl: 25-1st; 10-2nd; 5-3rd; 1-4th. Each team has a bicycle. A good one is worth as much as a second team member, and this is a good cause for some of the teams to catch up. The winning team will be present ed with a traditional "potty" Assembly Hears Makers

- Two babson alumni, John Sanderson and Douglas Wat son, lectured on opportunity in manufacturing as a part of the job counseling series sponsored by S.A.M. and the place ment office.

- Mr. Watson emphasized the importance of looking toward industry for job opportunities since 90 per cent of the Ameri can work force is employed by industry. There are two broad categories of jobs in industry: line and staff.

- STAFF OR LINE

- The majority of young men entering the line function will start as assistant foremen after a training period. From that position, the trainee may progress into that of foreman, plant superintendent, production manager, plant manager, divisional director, and finally, Vice President in charge of Manufacturing.

- Since college graduates lack the mechanical ability and practical experience necessary to effectively compete in the line, Mr. Watson advises securing positions in the staff function and then graduating into line. The various positions available to the entry level of staff are: industrial engineer, purchasing, personnel, production planning, and quality control. These are service jobs that aid and assist the workers in actual production. The majority of industrial applicants will go into staff cause of their lack of knowledge of the line function. The first of the line job that can be offered in industrial engineering. Jobs in this area are extremely valuable to the lin
February 8 was Race Relations Sunday in American Churches, with one of the main events being a call to end racism and prejudice. The day was marked by speeches and sermons, aimed at raising awareness and promoting understanding.

**PLAYBOY POLL**

The Jazz Poll is something that is done annually by most of the musical trade journals and other magazines. The poll is published a week before the Grammy Awards, at which each year concerning these polls, and that is how accurate it is? Most observers feel that these polls are mostly for the benefit of the personnel and don't give credit to the outstanding musicians.

---

**ON THE STREET**

BY C. B. SHEPPARD

Indecisiveness should probably be the key term used in describing the action for the week ending February 6th. The DJIA ended 11.67 at 328.84 in a weak market with the slightest tradings in the past two months.

---

**BOYD BRUNCH**

In the recent Playboy Jazz Poll it was interesting to note the diversity between whom all the public and the trade picked as the musicians who won selected. I imagine many of you have thought about this poll, but would like to hear more about it.

---

**OUR WEEKLY POLL**

The Downbeat Poll consists of critics' polls and a readers' poll. The critics' poll is conducted on an international basis and presents some interesting results. The European poll is usually completed more naturally by the musicians and the American poll is done in larger numbers. Another surprising result is the number of older musicians who win positions, as opposed to the newer generation. Finally, the number of musicians who are represented in the “hard-bop” phase of jazz seem to gain many votes in the Sacrifice Poll. It is also interesting to note that there are many young people who are choosing the musicians for their personal taste.

---

**PLAYBOY BIRTHDAY PARTY**

The party will be followed by dinner. After the Dance, Playboy will play host to all these activities and a formal PLAYBOY BIRTHDAY PARTY will be held.

**From The Sidelines**

*BY RONNIE SMITH*

A great deal of talk has been going around the campus during the past couple of weeks concerning the hockey team, and the lack of enthusiasm shown toward it. True, the turnover has been small and disappointing, and the sport should be discontinued at least for the year if present conditions continue. But, I think that recognition should be given to the members of the team who have shown enthusiasm. I don't think that the hockey team should be written off as a complete failure. **HANDCUFFS**

In my opinion, if you want to play hockey here at Babson, you have to really have to love the sport. First of all, the initial expense is great. To be completely outfitted, it can run over a hundred dollars. Secondly, the team has to practice due to the lack of their own ice, at odd, usually late, hours. Also because of the great expense for practice ice, they usually practice only once a week for only an hour. Because of this, it is very difficult to get into playing shape. When Babson does play a game, they usually have to travel to Worcester to play. The only time they can get the ice there to play a game is around nine o'clock or later.

**GOALIE THOMPSON**

Two players on the team deserve special mention for their efforts. Jay Thompson as a freshman is playing goal for the first time. It takes a lot of nerve to stand in front of a net facing the hard shots of the opposition. Jay Thompson, although he allowed 15 goals, didn't have a chance on a very few. He was either perfectly screened or a goal was scored on a breakaway. If he keeps at it, in the next couple of years, he could become a very solid goalie for Babson. Warren Swim, a senior in his first year of varsity competition, has improved from game to game. In the game with Merimac he scored a goal on a very smart play.

**CAPTAIN CRANE**

Charley Crane, the captain of this year's team, has had a very good year. It is too bad that he has had to close his hockey career here at Babson under such circumstances. The same applies to the other seniors on the team.

**NO SUPPORT**

Whose fault is it that hockey at Babson is in such a precarious position? It is certainly not the hockey team's fault. It is the fault of the rest of the student body for their lack of support as well as the administration for their lack of financial support. Hats off to the members of the hockey team; too bad the rest of the student body couldn't follow their example.

**OMEARA, TEAM BREAK RECORDS**

LOWELL BEATS B-MEN

On Feb. 5 Babson lost to Lowell Tech 64-67 at Babson. Brune and Cragg of Lowell combined to score 71 points between them with the former scoring 43 points and the latter 28. Lowell led at half 43-34 and pulled away in the second half for an easy victory. Jack Caveness scored 20 points for Babson followed by Dick O'Meara with 18.

**HOCKEY TEAM DROPS TWO GAMES**

The Babson hockey team lost the two games last week by a score of 3-2 at Worcester against Assumption and 18-4 against AIC at Springfield. At Worcester, they led most of the game but Assumption scored midway through the last half to win. At Springfield, AIC simply had too much power for the undermanned Babson team, and the score reflected this fact. AIC scored closest at will.

**DELTA SIG BEATS ADS**

Delta Sigma Pi continued on their winning ways in the race for fraternity sports honors with a 40-29 victory over Alpha Delta Sigma on February 5. The score doesn't indicate the closeness of the game, however, as ADS only was two points behind in the last two minutes of the game. The score was 29-17 in favor of DeltaSig at halftime. Mary Finn led their scores with 16 points followed by Jack Caveness with 15. Bill Chipman was high scorer with 24 points. Sullivan scored almost at will for fraternity sports honors.

**CAPTAIN RICHARD O'MEARA**

**ALPHA KAPPA PSI**

**BEATS B.C. TEAM**

The Alpha Kappa Psi Fraternity chapter on our campus toppled the Boston College chapter last Monday night in a nip-and-tuck game, as shown by the final score 61-59. Gamma Nu grabbed an early lead only to lose it by the second quarter. This represents the story of the season affair, neither team ever having a lead of more than 13 points.

Dick O'Meara entered the game in the second quarter and sparked his teammates with his presence. Babson came out in force to cheer for the team. Babson led 46-28 at the half and really turned it on in the second half for 58 points, another school record for the most points in one half. Bill Chipman was second high scorer with 24 points. Sullivan was high scorer for Burdett with 29 points.

SAGE from page 1
Bronco Coach Lines of Albion, New York. Although George Sage made this1conclusion a profitable operation, restoring financial stability for the first time in years, he derived little material gain from this venture, for profits were applied to debts incurred in the past.

PERSISTENCE
This was just the first of his operational rights of The Englainger Coach Lines. He still persisted to work hard with his businesses and studies, and after graduation obtained even more controlling interests in other lines. Today he has combined all of his small interest into three prominent and important bus lines.

Rarely has anyone held so steadfastly to a boyhood ambition, worked so diligently to achieve the success that is based on a thorough knowledge and experience of a business, or remained so keenly alert to the opportunities and developments of his chosen field.

George Sage strongly urged everyone to work hard toward their boyhood ambitions as they are still possible. Nothing is impossible if you are willing to give it your time, enthusiasm, and hard work.

During the question and answer period which followed, Mr. Sage discussed some of the problems which faces the transportation companies and what is trying to be done to overcome them.

CONTROVERSY fr. p. 1
former $2,54,000 and the latter $27,000. Quincy Junior College received the least with $7,000. Breckman stated that the loans equalled nearly 10 per cent of the request by the colleges themselves.

"RIDICULOUSLY SMALL"
Bowdoin's President, James S. Gales, called the grants to his institution "ridiculously small." Bowdoin received $728,000. Dr. Francis H. Hore, head of the university of Rhode Island, said: "Study of the grants made throughout the nation causes one to wonder about the basis on which they were made."

Several schools in Massachusetts received grants which would not be adequate to fill one loan. The crust of the situation is that $250,000 of the $76 million national allotment was earmarked for Massachusetts public and private schools. This, despite the fact that the schools themselves had requested a total of $3,239,000.

It is hoped that next year's Education Act will alleviate somewhat the problems in respect to both the loyalty oaths and the funds themselves. President Eisenhower has requested $44 million for the act and this should substantially make the distribution of funds now equitable.

S.A.M. from page 1
applicant since they will be associated with many different departments of the company. This association will build up a knowledge of the company and production which will aid in achieving a line position.

QUALIFICATIONS
Mr. Sanderson re-emphasized the importance of the knowledge that staff has to offer in obtaining a position. He suggested that purchasing is an ideal function to start in since it covers everything that the company does. When applying for a job, the applicant should first decide on what size company he wishes to work for: big, medium, or small. Each has its advantages and disadvantages. The applicant must weigh these qualities and pick the company that offers him the most security and opportunity. A production applicant must also have certain personal qualities such as: mechanical ability, since he will be in competition with men who have engineering degrees; a natural ability to get along with people; and an ability to express his ideas effectively.

DEFINITE OBJECTIVE
An applicant should have a definite job objective. Asking for a job in manufacturing is too generalized, and indicates that the applicant doesn't know about the manufacturing function or what kind of work he wants to do. Mr. Sanderson concluded by saying, that an applicant, not only for production but for any job must have a definite desire to do that kind of work, a desire to work for the interviewing company, and a desire to work in a specific area.
