This book is a series of friends and acquaintances' recollections about Babson, giving details about his character and lifestyle that can only otherwise be gleaned from reading the books he published. Each chapter represents a sketch of Babson, illuminating his capacities beyond business statistician. His creativity manifested itself in religion, nature, travel, writing, and a keen interest in the laws of gravity. Chapters in the book, such as "Love Affair with Dogtown," "Hail to an Empty Church," "Tale of a Friendship" and "Finding the Real Babson" do help the reader gain a greater understanding of a man whose life behind his celebrity status was as mysterious as multifaceted.
