Wellesley Hills, Massachusetts
Major: Finance

BRUCE S. MUNN
Wellesley, Massachusetts
Major: Finance
CAPTAIN GEORGE H. ADAMS
Oklahoma City, Oklahoma
Major: Management and Production

MAJOR LINDLEY C. ELLIS
Bradenton, Florida
Major: Management and Production

CAPTAIN FRANK P. K. BARKER, JR.
Gladwyne, Pennsylvania
Major: Management and Production

CAPTAIN EUGENE C. FLEMING, JR.
Jackson, Mississippi
Major: Management and Production

MAJOR HERROLD E. BROOKS, JR.
Lanham, Maryland
Major: Management and Production

MAJOR THOMAS F. KEEGAN, JR.
Westwood, New Jersey
Major: Management and Production

CAPTAIN OWEN E. LITZ
Twenten, Utah
Major: Management and Production

MAJOR W. DUGGAN
Bradford, Pennsylvania
Major: Management and Production

LT. COL. THOMAS J. MCDONALD
Scarsdale, New York
Major: Management and Production
As a major part of the United States Army’s program to send selected personnel to civilian universities, the Ordnance Corps assigns a group of officers to Babson Institute each year. By December, 1959, this program will have provided advanced management instruction to thirty-four officers ranging in grade from captain to lieutenant colonel. Working in most cases for an MBA degree, these officers have their regular courses integrated with a summer assignment at the Army’s Watertown Arsenal, a tour of local industrial facilities, and a fall program at the Army’s Boston Ordnance District. These activities are conducted under the direction of Colonel Lawrence J. Meyns, USA (Rtd) who is chairman of Babson’s Division of Management and Production.

From Babson these officers move to three-year utilization tours in the management field with assignments as procurement officers, comptrollers, program coordinators, and operating managers in Ordnance. Activities range from research, design, production, procurement to combat support of fighting equipment. The variety of end-items extends from hand weapons through artillery, tanks, automotive vehicles, nuclear and conventional munitions to guided missiles and satellites. The Ordnance Corps has prime responsibility for the Army’s fighting hardware. The Babson Institute Industrial Management Course under supervision of the Ordnance Training Command is aimed at increased efficiency and economy in defense activities.
