This News Article is brought to you for free and open access by the Babson Faculty Research Fund at Digital Knowledge at Babson. It has been accepted for inclusion in BFRF and BoR Newsletters by an authorized administrator of Digital Knowledge at Babson. For more information, please contact digitalknowledge@babson.edu.
Proposition Deadline
BFRF
CWL
Glavin Center

The common proposition deadline for major awards, 2010-2011 course releases, and 2010 summer stipends is the 3rd Wednesday in October:

Wednesday, October 21

The Common Proposal Packet contains all the information you need on proposition guidelines and revised application forms. If you have any questions, contact Susan Chern (x5339).

Impact of Faculty Workload Changes on BFRF Course Releases

Up to this year, the BFRF was the primary source for most faculty course releases for research. The new workload policy now provides all faculty (who don’t otherwise have a term or endowed chair) one course release per year for research provided that AQ standing is maintained. Under this new policy, each faculty member is expected to maintain a research agenda and output that meet at least the minimum requirement for AQ standing as defined in the Faculty Handbook – see side box. Please note that AQ standing will be determined internally on a three-year (not a five-year) cycle because it gives the College two-year lead time to allow faculty who may not be meeting the AQ standard to address the situation before the AACSB visits the campus. Going forward, the BFRF will fund course releases for scholarship that exceeds a faculty member’s minimum AQ standing. Similarly, holders of term chairs will be funded only for courses that exceed the two course releases already built into their contract. Faculty will be asked to demonstrate how they have met the AQ or term chair threshold and how the research proposal will enable them to exceed the threshold. With few exceptions (e.g., some faculty on administrative assignments), all faculty members are expected to have a minimum teaching load of three courses per academic year.

Faculty Handbook – Appendix H
Definition of “academically qualified”
- received his or her doctorate degree within the last five years, or who, with a doctorate degree received earlier,
- over the last five years, published two articles in peer-reviewed journals, or
- has created a portfolio of intellectual contributions equivalent to that output.
This paper explores the potential of such narrative innovations to unsettle the Manichean Allegory articulated by Frantz Fanon in *Black Skins White Mask*, while also considering how Phillips’ work intervenes in later debates about the force of the Manichean allegory among postcolonial literary critics. Finally, I show how Phillips’ literary work contributes to recent theoretical work about cosmopolitanism as a philosophical underpinning to the contemporary human rights regime.

*Plotting the Human: Unsettling the Manichean Allegory in Caryl Phillips’ *Cambridge and A Distant Shore*

This paper examines representations in the work of British writer Caryl Phillips of the lynching of African men as a punishment for their perceived connections to white European women. I argue that what makes Phillips’ work so compelling in terms of human rights is its attention to the human particularity of subjects historically fixed and made unrecognizable by their “types” and the conventional plots containing their association. Specifically, both novels juxtapose the narratives of a white woman and a black man—perhaps the most historically fraught convergence of subject positions in the context of race and human rights—in their historical contexts. The narratives mirror one another, reflecting and refracting the deep similarities between these subject positions which have been historically construed as irrevocably different and constructed as the stage for the violently dramatic tableaux of misrepresentations comprising miscegenation. This paper explores the potential of such narrative innovations to unsettle the Manichean Allegory articulated by Frantz Fanon in *Black Skins White Mask*, while also considering how Phillips’ work intervenes in later debates about the force of the Manichean allegory among postcolonial literary critics. Finally, I show how Phillips’ literary work contributes to recent theoretical work about cosmopolitanism as a philosophical underpinning to the contemporary human rights regime.

*The Strange Arrangement of Dreams*

*The Strange Arrangement of Dreams* is a piece of fiction, specifically a long short story. This fiction locates itself in the legend of Marie Taglioni, an Italian ballet dancer who was said to keep a plastic ice-cube in her jewel box as a reminder of the time in 1835 when she was forced to dance in the snow for a Russian highwayman. This fiction also draws on a 1940 piece of art made by Joseph Cornell that commemorates the tale, *Taglioni’s Jewel Casket*, held at the Museum of Modern Art in New York. The project intercuts fictionalized episodes from life of Taglioni with an imagined account of Cornell’s making of the piece of art. Alternating sections ask questions about the making of art and pursue nuanced connections between the box artist Cornell and the dancer Taglioni.

**Anne Roggeveen,** Marketing

*How the Order of Sampled Experiential Products Affects Choice*

The results of five experiments reveal that when sampling a series of experiential products (e.g., beverages or music), consumers prefer the product sampled second in a series of two desirable products but relatively prefer the product sampled first in a series of two undesirable products. The underlying process for both outcomes is a recency effect, such that there is better recall for the most recently sampled experiential product. The recency effect observed for experiential products reverses to a primacy effect while sampling non-experiential products (e.g., scissors). The authors also demonstrate that the placement of an undesirable experiential product in conjunction with two desirable experiential products can exaggerate preference for the later sampled desirable product (when the undesirable product is sampled first) or result in preference for the earlier sampled desirable product (when consumers sample the undesirable product between the two desirable products). However, the preference for the earlier sampled desirable product only holds if there is no time delay between the sampling of the products or between the sampling and the choice evaluations.
Faculty News

“Pathways to entrepreneurial growth: The influence of management, marketing, and money,” by Candida Brush and Dennis Ceru, Entrepreneurship, and Robert Blackburn, has been published in Business Horizons.

The Journal of Product Innovation Management has published “Adaptation and Organizational Connectedness in Corporate Radical Innovation Programs” by Donna Kelley, Entrepreneurship. This research was supported in part by the Board of Research. A second piece, “Intra-organizational networking for innovation-based corporate entrepreneurship” by Donna Kelley, Lois Peters, and Gina Colarelli O’Connor, appeared in the May 2009 issue of Journal of Business Venturing.

External Funding

Corporate, Foundation, and Government Relations Office (CFGR)

Wendy Silverman, Director, CFGR

The Office of Corporate, Foundation and Government Relations (CFGR) within Development and Alumni Relations at Babson College provides guidance and assistance to faculty and staff seeking funding from corporations, foundations, and government agencies to support their research and curricular development initiatives. Among the services provided are pre-award activities such as identifying and researching possible funding sources, assisting with cultivation of funding prospects and with proposal development and writing, particularly in the final draft stage, and ultimately with the submission of proposals. Post-award assistance is provided by both the CFGR and the Business Office. Among the post-award activities for which faculty and staff can obtain help are grant negotiation, budget clarification, financial and narrative reports, requests for extensions, and grant close-outs.

If you would like to explore the possibility of external funding or examine your research agenda please contact me at x5993 or silverman@babson.edu.

Community of Science (CoS) Funding Opportunities

Babson, with assistance from the Babson Faculty Research Fund, has subscribed to the Community of Science (COS) Funding Opportunities database.

The COS Funding Opportunities is the largest, most comprehensive database of available funding to support research and other academic activities. It has more than 22,000 records representing over $33 billion in funding. Grants are available for work in all disciplines—physical sciences, social sciences, life sciences, health & medicine, arts & humanities—and for many purposes, such as research, collaborations, travel, curriculum development, conferences, fellowships, postdoctoral positions, equipment acquisitions, and capital or operating expenses. Searching is easy and intuitive.

If you are looking for external funding ideas, this link to COS is accessible on or off-campus. If you want to explore external funding ideas, contact Wendy Silverman, Director Corporations, Foundations, and Government Relations, x5993.
