

The Future of Railroads: Historic and Economic Facts for Railroad Men, Shippers, and Investors

By Roger W. Babson

Published by Babson's Statistical Organization, American Edition, Boston, 1914

<http://babsc.iii.com/record=b1101744~S0>

Designed by Babson to show the likely result of the struggle among the shippers (represented by the government), the investors (represented by the directors) and the employees of railroad corporations. He describes government ownership in the first section of the book, railroads and employees in the second section, and offers several considerations for the working classes in his conclusion.
