Congressman Reuss

Second Sams Speaker

Representative Henry S. Reuss of Wisconsin, who serves on the budget committee in the Senate, will deliver the second Earl C. Sams lecture at Babson College on Monday, March 12, at 8:00 p.m. The lecture is part of the Babson Business Lecture Series.

PREREGRISTRATION

New registration program to facilitate registration—Mr. Ham's registration忘记了 terms at Babson has come up with a new plan that will allow the students to get into their classes on the second day of the semester.

Registration will enable all students to plan a class schedule and register for classes during the term. Upon return to college for the registration period, March 12-April 1, students can register online through the registration system, and you will not have to wait in the habitual "long line" to complete the registration process. The registration counselors in order to plan a class schedule, a master class schedule has been prepared and has been distributed around campus. Copies are posted in the library, dormitories, Park Manor (switchboard), and Trim Dining Hall.

The system is designed to make it easy for you to register, allowing you to review your courses and make it easy accessible for reference.

There are two main things to keep in mind in connection with this new system: You must take the courses with the section to which you are assigned. You will not be permitted to exchange the course name unless there is a course conflict which prevents the scheduling of required courses.

From The President

The student Handbook has the following to say on the subject of drugs:

"DRUGS—The illegal use or possession of narcotic or hallucinogenic drugs is prohibited. Cases will be dealt with by the Dean of Students in consultation with the college policeman.*

The stipulation that action in such matters be handled by the Dean of Students, rather than by the Student Judicial Court, was made because medical or legal reasons may make enforcement of the student judicial system impossible in a given situation.

At this time I wish to re-emphasize that the statement in the handbook, as well as Dean Stolzberg's letter on the subject, in no way removes or in any way minimizes the disciplinary aspects of this regulation. Every student should know that no one can use or possess drugs without impairing his position in the community. Anyone who disregards this policy will have demonstrated his lack of responsibility to the community and will be subject to serious disciplinary action.

Henry A. Krietsel
President

Business Initiative Award

Are you an individual who is a "start-upster" and who is adept at "founding a need and filling it"? If so, your latest business creation may be just the key to making you this year's winner of the Alumni Business Initiative Award.

This award is presented annually to the undergraduate showing the greatest business initiative in conducting a personal business venture. Your business may be operated on or off campus, and it may be a business which you operate during the academic year, or perhaps only during the summer months.

Should you apply for consideration, you will make an oral presentation before a group of Babson Alumni. Your presentation should include a discussion of the following: originality of the enterprise, motive for going into business, capital of the business, and your standards employed in conducting the business. You will also need to present and explain a set of accurate financial records which would reflect the current condition of the business. In addition, the alumni will be concerned with your academic record, the amount of time you devote to your business and the quality of your presentation.

The award this year will be presented to the winner during the alumni luncheon to be held on May 25. In addition to the winner's personal award, his name will be permanently inscribed on a plaque located in the library foyer.

Every student will be given an opportunity, in the near future, to apply for the Business Initiative Award. Should you apply, I know you will enjoy the competition, and should you be judged the winner, you will be the recipient of a truly worthwhile and satisfying award.

Attendance Policy Hearing

The purpose of the hearing is to gather information, not to make a decision. In addition to presenting opinions orally, opinions in writing are invited at any time to Mr. John Grassberger. Such communications may be signed or unsigned at the student's option.

Mr. John Grassberger
Mr. Alan MacDonald
Mr.klin Peterson
Mr. Paul Straka
Mr. Ward Feinsaid, Chair-

Penalty Fee

The Registrar reported that for Registration (Winter Term 1958) 120 men failed to appear during the scheduled registration period when facilities were available for this purpose in Knight Annex.

The number of late registering and therefore, commencing with the Spring, 1958 registration, scheduled for April 1, 1958, there will be a $5.00 fine imposed for late registrants and an additional $5.00 per day charged for each subsequent class day that the student has not registered.

Attention all you car owners—

Late Registration Fee The Registrar reported that for Registration (Winter Term 1958) 120 men failed to appear during the scheduled registration period when facilities were available for this purpose in Knight Annex.

The number of late registering and therefore, commencing with the Spring, 1958 registration, scheduled for April 1, 1958, there will be a $5.00 fine imposed for late registrants and an additional $5.00 per day charged for each subsequent class day that the student has not registered.

As an application for a refund of this fee may be made in the form of a letter with supporting documents addressed to the Ad- ministrative Council and left at the Registrar's Office within one week of the actual day of late registration. Each application will be judged on its merits by the Administrative Council.

The purpose of the hearing is to gather information, not to make a decision. In addition to presenting opinions orally, opinions in writing are invited at any time to Mr. John Grassberger. Such communications may be signed or unsigned at the student's option.

EDITORIALS

Our Dry Dock

What price will it be this week? This question is being asked increasingly by the student body as prices continue to rise at our Dry Dock. It has been stated by the owners that either the quality of food has gone up or labor costs have risen, thus necessitating a price increase. After a while one begins to wonder whether these are the real reasons for the price increase? Focus- ing on another aspect of the Dry Dock's operation is the fact that a product such as popcorn, which students desire, cannot be sold at a profit, and in turn does not get supplied through the "student snack bar." We of the EXECUTIVE call for a student government investigation of the Dry Dock's operations. This investigation must keep in mind the fact that the Dry Dock should provide a service to the students at reasonable prices, allowing a moderate profit to the owners. In addition, the government must devise a plan to supervise the Dry Dock's operation or a plan should be considered to have the government take over the Dry Dock.

Parking Problem

Necessity is the mother of invention or so the old saying goes, and this winter the inventive Babson drivers have come up with a novel but practical answer to an age-old problem on this campus, namely parking. Diagonal parking on Broad Street provides space for approximately twenty-five cars, whereas the parallel parking procedure used in the past did not allow for more than five. At present, the campus parking police inform us that automobiles found parked diagonally on Broad Street will be ticketed as improperly parked. If memory serves correctly, it was members of the Police Chiefs Association of New England who first instituted this practice, and it is the opinion of the EXECUTIVE that the Administration should take their clue from these traffic experts and change the existing regulations to allow diagonal parking on Broad Street.

LETTERS TO THE EDITOR

To the Editors:

During my short range of experience at Babson, I have been greatly troubled by the particularly large size of my classes and the classes of all students on this campus. I feel that this is an important and valid gripe which must be dealt with very soon in order to insure the high quality education that is expected at a Babson graduated.

The experience of every student will agree with the idea that much work is being accomplished and it can be done in a much more interesting way when the professor has to deal with a minimum number of students. Small classes reduce the stress associated with the larger atmosphere which is more conducive to good articulation, participation, discussion, and contribution to the end product of a higher degree of intellectual among participants.

In a school where the undergraduate division is less than 700 students, there is absolutely no need for classes of more than 25 or 30; but, my history class has 55 plus students and my logic class has better than 70 students — 10% of the student body. I wonder how many other students at Babson not only feel dissatisfied but dissatisfied when they think about the disparity in size of class and size of student body.

This expression of mine is meant not only as a gripe, but as an invitation to the administration to voice their concern to the union on the situation in the hope that the condition can be improved post haste, if not completely remedied.

M.J.

Student Center

The student center committee, appointed by Mr. Paton with the approval of Student Government, has been working on the student center for several months. Construction in the basement of Park Manor has been going on for the last two weeks as electricians, carpenters, and decorators arrived. Co-chairmen Wayne Chodkowski and Robert S. Germain along with Larry Knaus, Bob Knecht, Bob Parkins, Richard Watkins, and Tom Wallack have been discussing the concept of the center. At the last meeting this week, the concept of the center will consist of the Gordon linen room, W.R.C., the lounge, the executive office, the Dry Dock office, the Babson office, and the student cafeteria. The South end will consist of a television room, and a large game room.

It is hoped by the committee that several of the rooms will be completed for use Spring semester.

Dear Mr. Stakes:

This past weekend the New Ocean House had the pleasure of hosting the follow-up Institute students for two evening programs. We found the students to be a credit to the Institute. They were orderly, Polite, and did not in any way cause problems for the hotel staff.

A return visit would be welcomed.

Yours very truly,
William J. Ireland, Sales Manager.

THANK YOUR BABSON

Editor's Note: The following letter was sent by Mr. George Kreisel, and it is in his wish that the sentiments expressed herein be conveyed to the appropriate parties.

Dr. Neary A. Knebel, President Babson Institute
Box 10, Mass.

Dear Sir:

For three weeks, January 25-30, 1968, I was a guest of Babson Institute while attending the Police Training School at Lynn Hall on your campus. I was impressed with the courteous and professional manner in which the faculty and students were associated all the members of the police school by your students. It is my wish to convey to them, through your offices, my gratitude, sincere appreciation for their flawless hospitality. Also, I take this opportunity to thank YOU for making our training possible. Without your support and cooperation we might still be doing this desperately needed job for less than half the cost. I was grateful for what you have done for us.

Yours truly,
Donald C. Dow

February 22, 1968

THE PEACE CORPS CRISIS

by Walter Grant

Washington (C.P.)—The Peace Corps is in the most difficult period in its seven-year history. Few would deny that the Peace Corps has been one of the most successful American ventures of the New Frontier programs initiated during the Kennedy Administration. Not the Peace Corps now faces many new and delicate problems. The direct result of the war in Vietnam.

The tautness with which these young people are held in the next few years may well determine whether or not the Peace Corps can survive on a large scale. If it can, how effective it will be, it can accomplish its original mission.

The Peace Corps officials, who in the past have had little trouble convincing young people to give up two years of their life to work in an underdeveloped country now find themselves on a defensive mission for the first time. The main problem is the Peace Corps' close association with the federal government of a time when the government is not as close among young people.

For this reason, and because, in the opinion of many, it has over the years become too closely associated with the government, the Peace Corps has made some minor changes with recruitment, training and movement to places.

But since most Peace Corps volunteers have to leave the country within five months, by the new policy the Peace Corps has made some changes this year are running about 4,000 behind last year. But with our major recruiting drive still ahead of us, we expect to at least equal or perhaps even equal, to Vaugan says.

Despite efforts by Corps officials to convince the public that it is not losing its appeal, officials of the Corps are more controversial on the campus than ever at any other time in its history.

The main reason for this, Vaugan says, is that the Peace Corps is not suffering from the recent cutbacks in the administration of the federal government. He added, "Before the United States became deeply involved in the Vietnam war, young people did not mind so much being associated with the government, but now they do."

However, Vaugan says the expanding group of student radicals who want to be completely dedicated to a cause is not affecting the Peace Corps. "We don't in any sense, or even now, tried to tailor a message for the activist. Our message is more to the concerned, and the concerned can be almost any political stripe," he added.

But Vaugan admits Peace Corps volunteers are more difficult now than it was several years ago. "Most campuses are bolling," he said. "There's more noise and more bitterness. Which makes it much harder for us to get our message across."

Although the Peace Corps is associated with the Establishment, there have been no problems between recruiters and students. According to Vaugan, "Words have been exchanged on occasion, but nothing to consider a confrontation."

The major problem for Corps recruiters now on the campuses is the difficulty of getting benefit in the right ways. He would execute the call on an upward movement and the put on the decline.

The problem now is to get the campus to the concept that the boy is straddling a particular stock. He buys a PUT and a CALL on the same stock, at the same price, on the same number of shares, for the same period of time. A STRADDLE is identical options, one a PUT and the other a CALL. You can execute one and not the other, and there therefore becomes benefit in the right ways. He would execute the call on an upward movement and the put on the decline.

What the call to the again is artificial gymnastics. We are nothing more than stocks, or the option to the call the benefit in the right ways. However, there is this difference—the price PUT is below the current market and the call price is above the current market.

Both a STRADDLE, both PUT and CALL option price would be 50. Now, if the current price 50. If the current price 50, the PUT might permit the holder to sell at 48 and the CALL to buy at 53. Since the SPREAD does not grant the same advantages as the STRADDLE, a SPREAD on ABC would be purchased at a consumption price.

STRIPS and STRAPES—these terms are not as self-explanatory as the above, but you will remember that a STRADDLE is a PUT and a CALL with industrial warrants! When these options are not assigned the following terms: STRIP—PUT & CALL, STRAP—

PUT & CALL.

The best explanation of PUTS and CALLS and other combinations of options point out that in every case the total risk to be the sum of the two options of the contract. The buyer executes his option if it is profitable to do so or permits it to expire if the stock does not act in favor of the life of the option. The cost of the option is the premium, a sum deductible item. It is either a short- or long-term capital loss depending upon the length of time the option was held.

The Financial Corner

by Irwin Manov

To continue last week's discussion on PUTS & CALLS, I will now go into some of the devices used in these operations.

The STRADDLE—relatively simple but possible in the college is straddling a particular stock. He buys a PUT and a CALL on the same stock, at the same price, on the same number of shares, for the same period of time. A STRADDLE is identical options, one a PUT and the other a CALL. You can execute one and not the other, and there therefore becomes benefit in the right ways. He would execute the call on an upward movement and the put on the decline.

The problem now is to get the campus to the concept that the boy is straddling a particular stock. He buys a PUT and a CALL on the same stock, at the same price, on the same number of shares, for the same period of time. A STRADDLE is identical options, one a PUT and the other a CALL. You can execute one and not the other, and there therefore becomes benefit in the right ways. However, there is this difference—the price PUT is below the current market and the call price is above the current market.

Both a STRADDLE, both PUT and CALL option price would be 50. Now, if the current price 50. If the current price 50, the PUT might permit the holder to sell at 48 and the CALL to buy at 53. Since the SPREAD does not grant the same advantages as the STRADDLE, a SPREAD on ABC would be purchased at a consumption price.

Black power should not only have the commotion of destruction that accompanies the images of Stopp Brown or Stokely Carmichael. Constructive black power is that which strives to give the Negro the sense of independence and identity which 'roots' from the establishment of an economic basis for the Negro. In Roxbury, a group of businessmen and community leaders are forming the first black bank in Massachusetts. This bank is the 'Unity Bank and Trust Company,' organized and chartered by the State Banking Commission and plans to open its doors by the end of May at 416 Warren Street in Roxbury.

The organizers of this bank headed by Donald J. Sneed, Jr., Chairman of the Board of the Unity Bank spoke here at Babson last Thursday evening and stressed that they intend to prove the tangible results achieved when a black bank works together. "Constructive black power is what the Negro really wants," Sneed said. "It is what he needs to be allowed to get involved and be judged by his qualifications and not what he may contribute to society."

The Unity Bank and Trust Co. was founded to meet the "necessity of having a bank in the community which would be solely attuned to the requirements of the Negro, as well as the white community. Its organizers, directors, officers, employees are Negro and white. Its purpose is to give people of all races, colors, and creeds financial advice and counseling."

The plight of the people of Roxbury has created the necessity for Unity Bank. Presently there are eight banks in the Roxbury area of which none are owned or operated by Negroes. Thus, in the black community of Roxbury, there is nothing for the Negro people to identify with, and many leave the Roxbury area and goes into white banks in other communities. Unity Bank will give the opportunity for some to have enough money and interested in the community they serve. Mr. Sneed stressed that the advantage of this bank over any other existing bank in the community is its "approximability" by both Negro and white people who need financial assistance or advice.

BRIECK HUBBARD
Stock of the Week

by Ben Frerkenham & Tyler Hammond

At a time when great uncertainties surround the stock market, one must look for special situations that are based more on the prospects than likely to go up in price no matter what happens to the stock market.

One such special situation is Grazier & Co., Inc., traded over-the-counter under Insura Stock.

Grazier & Co., Inc., a holding company, owns 88% of Rennin Airways, 79% of Franklin Life Insurance, 59% of First Western Bank and Trust, 100% of Roseweave Insurance, and 59% of National Car Rentals.

MERGE WITH LVY

What makes Grazier a special situation is a fact that they are in the process of merging with Long-Tempo-Vought, a large conglomerate listed on the New York Stock Exchange. The merger will be completed by April 1.

LVY, Inc., has a stock price of $20,000,000 per 10-share unit. The chairman of Grazier has tendered his stock and all regulatory agencies have approved the merger.

The value of the stock is often the largest factor in determining market price. The stock market is going through one of its periodic dips, and it may go lower. The state of mind of the multitude of investors is difficult if not impossible to predict. Yet, investor psychology historically gives many a clue to the behavior of bonds such as the one being offered to Grazier & Co., investors see a large difference between debt as represented by bonds vs. equity, and warrant representation by common stock.

At full face value, the debentures will yield 5%. This high yield may make the Debenture bond go up too low in price since the yield becomes very high when the debenture value drops below $25,000 in $5,000. In our estimation, this is about the lowest the debenture will go.

The warrant adds a little of the exchange, I.T.V., currently selling for $35 a share, will hold the warrant conversion price in $15. Although the common stock is about $25 below its conversion price, the warrant will sell at a high premium over its true value because of the long life. A similar warrant just issued by Field and Western Industries came out at $30 a warrant.

STOCK PRICE RISE

As we see it, the debenture and warrants being offered by I.T.V. are worth anywhere from $37 to $50 per share of Grazier & Co., Inc., currently quoted at $20. If the price rises, I.T.V. will be worth more than $100.

If we get the market price of Grazier & Co., Inc., will start soon to reflect this by going up in price. By purchasing Grazier, you can sell your stock right before the stock conversion deadline (April 1) at a hoped-for profit or at least your shares for their true value.

In the near future, we will write an article on warrant leverage and the price potential of some warrants, such as the I.T.V., warrant that will start trading April 1.

NOTE: Information has been obtained from sources believed to be reliable. Opinions based on these sources are not guaranteed.

INTERVIEW

with DR. WERTHEIMER

by Tom Bryan

"We have been trying to solve the problem of solar energy for many years," Dr. W. W. Wertheimer, said in an interview with The Executive. "The problem is very complex and it is difficult to find a solution." He went on to explain that the solar energy process is still in its early stages and that much more research is needed before a practical solution can be found.

Dr. W. W. Wertheimer is a well-known physicist who has made significant contributions to the field of solar energy. He has been involved in research and development for over 20 years and has published numerous papers and books on the subject.

He explained that solar energy is a clean and renewable source of energy that could help solve the world's energy problems. However, it is important to note that solar energy is not yet a practical solution and much more research is needed.

Dr. W. W. Wertheimer also discussed the current state of the solar energy market. He said that while there are many companies working on solar energy, the technology is still not fully developed and the cost is still too high for widespread adoption.

He ended his interview by saying that he is optimistic about the future of solar energy and that he believes that it will become a major source of energy in the coming decades.

The interview was conducted by Tom Bryan, a journalist for The Executive, who is well-known for his insightful reports on the energy industry.
Jenkins Resigns

Robert R. Jenkins, assistant di-
rector of the admissions office at Babson since 1964, has resigned to ac-
apropriation of director of admission for the Teaneck branch of Fairleigh Dickinson University in New Jersey. The Teaneck branch, one of three in the state, has 1,000 students and approximately 5,000 enrolled in the evening program. Jenkins resignation became effective immediately, and he has already started his new duties at Fair-
leigh Dickenson.

Jenkins received his B.A. degree at Babson in 1958 and the M.B.A. degree in 1963. He was an administrative assistant and a member of Delta Sigma Pi. At a farewell dinner, attended by a large group of members of the faculty and administration on the evening of February 14, Everett W. Stephens, vice presi-
dent for development, paid this tribute to the former assistant director of admission: "For more than twelve years we have known Bob as a student, and as a member of the Babson administration. Over this period, he has been a happy association. He has been loyal and dedicated to excellence at Babson, and it will be difficult, if not impossible, to replace him. He has served his alma mater with distinction, and we shall miss him".

Director of Admission, Frank Wurth B., and President Henry A. Kirbel, both of whom were present from the campus on Febru-
ary 14, bestiegat best wishes which were read at the dinner.

The Computer: The Vital Subject

by Tom Whiston

Experts differ on the expense. The great expanse of operating a computer emphasizes the importance of efficient and well-planned use of the computer.

At the last meeting, the Fac-
ulty Colleges Committee heard from Professor Richard Buchin of the Harvard Graduate School of Business a computer by colleges and the possible ad-
"development of the Babson computer," announced Dr. Kirbel. Buchin has been at Babson, and was asked by the committee to prepare a computer. He stressed the importance of the computer to this subject, and has researched the subject in experimental, but the results have stimulated more faculty and student com-
puter use.

There are several possible levels of the use of the computer in education. These levels include that of the faculty level, at which a member or assistant uses the computer to prepare his material; the students' level, at which the student writes his own project, uses a library of standard programs, or uses a standard program to augment his studies; and the level at which the problem of creating a proper file is solved, and the decisions to be performed by the desired computer output is solved. Each of these three levels results in savings accounts and invest-
ments. Mr. Buchin emphasized that many of the existing prob-
lem can be solved through eco-
omic planning and that the door must be held open to give the Babson the opportunity to better his position in the community. Through the support and the success of this bi-racial finan-
cial institution, it will be proved that Negroes can organise and successfully operate business ventures when given the op-
portunity. The success of U.S. will prove the possibility of raising the living standards of the Negro through opportunity and constructive black power not through charity or des-
truction.

Investment Counselors

Since 1904

Dun & Bradstreet will conduct interviews on campus March 1, 1968

A one year development program has been designed employing the selected project concept. Permanent positions will be responsible staff assignments or higher level management jobs that are appro-
priate to the individual's aspirations and capabilities.

Copies of our brochure, "Dun & Bradstreet and the Information Explosion," are available at your placement office.

For specific details sign up to talk with our representative on March 1, 1968.

Dun & Bradstreet Inc.

As Equal Opportunity Employer
Babson's Swimming Team

Individuals Outstanding Dispite A Poor Record

The Harriers of Babson have been breaking the swimming records every meet this year and also swimming individual best times. Unfortunately, the team's chances for winning meets appear poor because of the lack of swimmers and two divers as opposed to the fifteen-man teams of our opponents.

Captain Ken King was continued to break all of his own and Babson records set last year. Out of eight possible individual college records, Ken holds six plus two or many other honors including two University of New Hampshire pool records in the 200-free style and 50-butterfly.

RELAY TEAM
Our relay teams have also broken Babson records in the 400-medley and freestyle relays. Against Holy Cross, Dave Williams, Ken King, Ralph Maloney, and Randy Godfrey set a new medley relay record of 4:37.7, taking two seconds off the record time of 4:59.3 set by W.P.I. earlier in the season. The freestyle relay team of Ed DeRosa, Randy Grims, Ken King, and Ralph Maloney swam a record time of 3:44.7 against Pftka.

In the diving event, senior Emil Neuberg and freshman "Trey" Weas have set personal highs all season. Against the M.I.T. freshmen, Emil established a new Babson record of 33.55 award points. In the same meet, "Trey" scored a career (which began in late October) high of 43.95 award points to win second place behind Emil.

OTHERS OUTSTANDING
Coach Green points out that two other swimmers are worthy of mention. Sophomore Dave Williams has been trying to break the 2:30 barrier in the 200-yard breaststroke all season. Dave swam the event in 2:33.1 against M.I.T. last week and is now looking to break through 2:30 plateaus before the season ends. The other noteworthy swimmer is freshman Ralph Maloney who is aiming to break Steve Smith's two freestyle sprint records in the 50 and 100 freestyle. "If anyone can topple Steve's long-standing records, it will be Ralph this Saturday against Norwich. With both Ralph and Kenny swimming record times we have a chance to beat Norwich," says Coach Green.

NEXT HOME MEET
This meet home meet is this Saturday, February 24, at 2:00.

ATHLETE OF THE WEEK

Athlete of the Week is Kevin Leip from Ashland, Mass., who is currently captain of the Babson basketball team. Under his leadership, the Beavers' record in 13 and 5, and the team is in a good position for a post-season bid. Kevin's scoring average is 22.7 points per game, 17th highest on the team, and he leads the team in assists per game with 13. Besides being captain of the basketball team, he is an active member of Alpha Delta Sigma fraternity and works to maintain excellent grades.

The highest tribute paid to Kevin this year came in January when he was chosen for the E.C.A.C. All-Star team as a starting guard. Coach Olsen echoed these sentiments when he said, "Kevin's ability, coupled with desire and hard work, has made him a great all-around ball player. His hustle and leadership on the court have inspired his teammates all season long."

In the season's biggest game against Bryant College, Kevin scored 24 points and led the team to a 75-67 victory enabling the Beavers' to tie Bryant for first place for the second time. Kevin, as usual, saved one of his best performances for the season's biggest game. As leader, scorer, and motivating force, you could never ask for a better man than Kevin Leip.
