TheatreWorks To Present Ibsen Play

MATT OLSON
ARTS EDITOR

TheatreWorks, Babson's new theatrical program, is set to debut with two terrific showings of "The Master Builder" at the Sorenson Theatre this weekend. An Ibsen play will be the scripted performance and the first production by the TheatreWorks group, which was formed only months ago.

In the show, Halvard Solness, an architect in a small Norwegian town, works tirelessly for years to earn himself a name and become the 'master builder.' However, when a 10-year-old love vow shows up, by the name of Hilde Wangel, unrest is multiplied as the famous tragedy unfolds.

Said director of the Sorenson Center, Burt Hash: "The issues of the play are relevant to this campus because Halvard basically sacrifices himself so that he can become the master builder...a lot of people are focused on one thing when other things in life are left out."

While it is a certainty that this TheatreWorks performance will deliver a great night of entertainment, it will also make extensive reference to people's pursuits in life. Perhaps one of the underlying reasons why this play is being brought to Babson is to show the relationship between personal strivings and commitment to holistic education."

Just a few years ago when Burt Hash arrived at Babson, no studio arts were offered on campus. Since then, a clay studio below Roger's Pub, which has open studio hours every week on Monday, Tuesday, and Wednesday nights has opened.

There is also a photo studio in the basement of Park Manor Central and a new four-credit advanced elective photography course.

Last spring, an exhibition was held of works that students had made in these facilities. According to Hash, the interest keeps growing and growing. Thus, Hash and other administrators began considering options about having a studio arts facility.

President Higdon is very supportive of the arts and was instrumental in the planning of this new facility. He met with Richard W. Sorenson MBA '68, CEO of the Babson Corporation. The commitment to the project by Babson College's Board of Trustees was essential. The Sorenson Center for Studio Arts will contain a resident artist studio, dark room, digital photo computer lab, and gallery. The facility will only exist for five to six years before a new building is constructed.

Babson Plans to Build Studio Arts Center

BEN LEWIS
SENIOR COPY EDITOR

Opening for the Fall semester of 2001, the Sorenson Center for Studio Arts will be located in Trim and house a studio classroom, ceramics studio, resident artist studio, dark room, digital photo computer lab, and a gallery displaying works produced within the facility by students.

"This is a very exciting event for Babson," explained Burt Hash, Director of the Sorenson Center for the Arts. "Employers want to hire creative people who are well-rounded individuals. This promotes creativity within the business world."

President Higdon also expressed enthusiasm for the project when saying, "It is very exciting to see this expansion of the arts at Babson...the addition of the studio strengthens our commitment to holistic education."

Wong To Leave Health Services Post

JONATHAN GLOVER
NEWS EDITOR

Ian Wong, the director of Health Services will be leaving Babson to pursue a position at the Massachusetts State Department of Health. Wong has been at Babson since 1991 and will be leaving on October 26.

The Massachusetts State Department of Health has offered Wong a position where he will be responsible for overseeing all the colleges in Massachusetts with prevention efforts. "I will be doing exactly what I do here for Massachusetts," indicated Wong.

Wong went on to say, "The offers I have received comes from the opportunities Babson has given me." Wong has seen many Music Store Opens in Reynolds

JAVIER TORRES
BUSINESS & TECHNOLOGY EDITOR

There is a "new kid on the Babson block who is making some noise down at the Reynolds Campus Center." That's Nick Rubin, member of the class of 2001, who has recently opened up a new CD music store in Reynolds, where the old Babson Tasting Company was previously located.

The name is Sound Factory Babson and it opened for business on October 12th, 2000. The store's primary business is the selling of "Hard to find international club music CDs," says Rubin.

Other items that can be found at the store include glow sticks, jewelry, watches, sunglasses, and T-shirts with logos from many distinguished nightclubs in Boston. "Anything anything everything essential to trash the club scene with some serious style," said Rubin.

Casino Night was held in Trim this past Saturday as part of Parents' Weekend activities. Turn to page 2 to read about the event.

Awards Ceremony Recognized Student Achievers Saturday

TRICIA CUBELLIS
CONTRIBUTING EDITOR

Saturday, October 21, the Annual Babson College Awards Ceremony was held in the Sorenson Theater. 22 students were recognized for their achievements at the College.

Jessica Barry '03 and Seth Kozlowski '03 were awarded the Michael Sainovich Memorial Award. This award is given to a sophomore, male or female, who, as a freshman, both excelled academically (GPA of 3.5 or higher) and contributed to the Babson community through their involvement.

Barry reacted by saying, "I was surprised, honored and grateful for the award I received. I was very proud to be a part of such an event with some incredible people. As a sophomore, it gives me something to work hard for because you do get recognized." The Heather Maloy Award was presented to KERRYN BRYAN '02. This award recognizes students who have displayed hard work and dedication to curricular and co-curricular life, as well as drive, perseverance and optimism in the face of challenge.

Michael Berard '03 received the Babson College Outstanding Philanthropic Activity Award primarily for his involvement as President of Habitat for Humanity at Babson.

Nikita Vaswani '02 and Brian Pangasinan '02 received the award for Business.

SA GA Meeting
October 25, 2000

At last week's SGA Meeting we brainstormed with the House of Representatives to get a feeling for what the student body feels are the major issues around the Babson Campus.

The purpose of this meeting was to give the House of Representatives a better understanding of what the Babson student body feels are the major issues around the Babson Campus.

The Student Affairs committee was established to tackle issues such as the door alarm system and instituting a shuttle system run by the Babson Cafe.

The Campus Life committee will be looking into topics such as the card swiping system and installing more change machines around campus.

The Public Safety/Physical Plant committee is in charge of looking into questions regarding additional lighting for walkways and campus buildings.

The Social Committee is working hand in hand with the Campus Activities Board to help generate more ideas about additional events that will add to the Babson experience.

The Technology committee is working with ITS to improve the ListServ email system and to increase the usage of E-Campus by freshmen.

If any of these issues interest you, feel free to contact any SGA representative or just come to the next meeting.

Also at next week's meeting Shelley Kaplan will be coming to speak to the House. The meeting is held at 6:30 P.M. in Trim 201-202. We hope to see you there.

Babson to Build Sorenson Center for Studio Arts
Continued From Page 1

Carling Street Faculty discuss the possibilities of funding new arts facility.

Briansa Kling '01 commented, "The new studio arts facility is definitely needed. I love the photography class that I am currently taking and feel that more classes in this field should be offered...and this facility will help Babson offer more of a variety of art classes for students."" Richard Sorenson...has made another generous commitment to the college of approximately $1.0 million to construct the new arts facility in Trim," stated Higdon in an e-mail sent to the community.

Sorenson also gave Babson a three million dollar endowment to cover the operating costs of the Sorenson Theatre.

MICHAE L BERARD
Executive Director

The annual Parents' Weekend Casino Night was held last Sat- urday, October 21st. Approximately five hundred students, parents, and administrato rs all mingled amidst the good-natured competition of mock gambling.

The Las Vegas style event possessed a number of gambling booths, cocktails, and a preview of Babson Dance Ensemble's full performance were all included.

Games included blackjack, craps, roulette, and poker, among others. Each participant, student or parent, received $250,000 in mock currency to trade for chips.

At the end of the night, chips were cashed in to buy raffle tic- kets for seven different prizes, inc luding a CD burner, a DVD player, and an MP3 player.

Casino night 2000 was gener ally received with enthusiasm, evening - one of even higher quality than in the preceding years.

Angelo Famularo BS '00 summerized the perceived positive aspects of the evening. "Cas- ino Night is always a fantastical night for the Babson students of themselves giving presents, playing games, and many other activities.

The digital lab complemented the game play, giving the students a chance to learn as well. Editing will allow this concept to become a reality. Plans are al ready in the works to have a new facility and integrate it into the curriculum. Students will be expected and trained on the tech- nology as freshmen to enhance the FME experience.

The arts center will greatly enhance our capacity to support the rich array of talent in the Babson community," added Higdon.

There will also be additions course offered next full in relation to the same facility. The Liberal Arts Department and Burt Hirsch in meeting a few weeks will focus on the structure of the course. I think [the course] should be an intro-level course and focus on digital editing, indicated Hirsch.

The current plan for this new facility is to locate it at an interval basis with a time span of five to six years. After that, administrators are looking at a joint venture possibility with Olin College to build a studio in this area.

"[This facility] is a great com- munity building tool...it makes Babson a great place to be," concluded Hirsch.

Awards
Continued From Page 1

Elliott said it was "an honor and a humbling to be recognized for the work that I've done at Babson," a gesture she described as "generous, and it made a good ex- us to go to the Cheesecake Fac- even after the fact..."

The Michael Conlon Memorial Scholarship Award was presented to Marnell Conlon. The recipient of this award is cho- en by the family of the late Michael Conlon for their status as a var- iety athlete, excellent school citizen, and outstanding achiever in the classroom. The student must also be an integral part of the Babson Community and contrib- ute to the community in a signific- ant way.

Wierzenski described the honor of being presented with the award as "very exciting." She said that the people who participated were "extremely honored that Michael J. Conlon's family chose me to re- ceive the award...with this name."

Who's Who Among Students in American Colleges and Universi- ties honored 15 seniors who were nominated to 15 seniors these year. These students have excelled in the ar- eas of academic, extra-curricular, and community service to the College and poten- tial for future achievement.

The seniors to receive this award were Meghan Altman, Kurt Beletto, Amy Ellis, Evan Gross, Jayme Johnson, Benjamin Leipold, Angela Botticelli, Sean Carragher, Cara Madill, James Page, Michael Osgood, Supakrishna Singapati, Javier Torres, Matthias Weisheit, and Shaitte Fitzgerald.

Fitzgerald said, "The cer- emony was very nicely done. President Hirsch gave his usual great speech and there were even some touching moments. I am grate- ful to all that Babson has al- lowed me to accomplish."

James Page reacted by saying, "I am very happy, it was a pleas- ant surprise."

Angela Botticelli commented, "I thought it was a great honor to receive the award. I was thank- ful and appreciative to have been chosen."

Casino Night Entertains Parents, Babson Community
News Briefs
"Free Parking" to Babson Monopoly Champion
Van Winkle Hall and the Office of Campus Life will be hosting Monopoly Competition 2000, an all-campus Babson tournament. A "Free Parking" pass will allow the winner to park in any lot on campus through May 2001. Elay estimates the value of this pass at $700.

The Babson Monopoly Champion will be crowned after three rounds of play. The first round is open to all Babson undergraduates and will be held Oct. 29th and 30th at 9:00 PM in Van Winkle’s main lounge.

Sixty-four students are registered to play. The Boston Globe and other local media will be on hand for the event. Questions should be directed to Matthew Osolinski. at 6468.

Congratulations to the Newly Elected Members of Babson’s Steering Committees:
- Class of 2001: Suzanne Sullivan
- Class of 2002: Brett Daniels, Michelle Malone, Heather Webster, Jennifer Guarino, Lindy Holway, Joshua Hyman

New Name for Physical Plant:
The Physical Plant department has now changed their name to Facilities and Services and are listed under the new department head.

Programs staff, and learn about international at Babson during our Multicultural Week Open House. Everyone in the Babson Community welcome!

When? Tuesday, October 31, 2-5 p.m.
Where? 207 Hollister Hall
What is in it for you? Free international food, games, prizes, and a chance to meet with the OIP staff.

For more information contact: Amir Reza - areza@babson.edu or call X5506.

Multifaith Memorial Service:
The Office of Spiritual Life will offer a Multifaith Memorial Service on Wednesday, November 1, 2000 at five o’clock in the afternoon at the Glavin Family Chapel.

The service will feature readings and prayers from a variety of religious traditions, and it is open to students, staff, and faculty, as well as all other members of the Babson community.

Those who attend the service will be invited to speak about and light a candle in memory of loved ones. If you would like to name your loved one(s) listed in the program, please call the Office of Spiritual Life at x5623.

Class Registration Advising:
The Class of Deans Office is committed to providing support for undergraduate students as they plan their courses for the Spring 2001 Semester. To that end, we are adding additional hours and opportunities for students to seek consultation.

Due to the heavy demand during this time, we ask that students limit any registration questions to the upcoming semester. Senior Screenings, personal support and other functions of the Class Deans Office will continue as always during this period.

Lunchtime advising will take place Thursday, October 26 in Trim at 12:30 - 2:00 P.M. and Wednesday, November 1 in Reynolds at 11:30 - 2:00 P.M.

Late night advising will take place Monday, October 30 Hollister from 5:30 - 8:30 P.M. Thursday, November 2 Hollister 5:30 - 8:30 P.M., and Monday, November 6 from 5:30 - 8:30 P.M.

Walk-in hours are held Tuesday, November 7 from 9:00 - 4:00 P.M.

Ilan Wong Soon to Leave Health Services Position

Under Wong’s tenure he aided in facilitating the Health Services’ move from the old infirmary near the West Gate to their new space in Hollister, which is much more centrally located.

Wong will miss his staff, the facilities, and most importantly the students. "(Babson) has one of the nicest facilities anywhere. One thing I'll miss is the interaction with the students," announced Wong.

Tim Mann is currently searching for someone to fill the position left open by Wong’s departure.

One of the things Wong is very proud of is the unique relationships he has been able to build with students; he has had the opportunity to get to know students both professionally and personally. "Health services is composed of the entire staff, and the staff has been together for a long time and is dedicated to serving the Babson community," commented Wong.

In addition to being director of Health Services, Wong was the former president of the New England College Health Association. In this role he worked hard to get people to make college healthcare gain importance.

He feels that a lot of attention is being put on HMO's and other things, while college healthcare is neglected even though it is just as important.

He plans to continue his effort for college healthcare recognition until more attention is given to colleges. Wong indicated, "People do not realize how well respected Babson’s Health Services are."

The first project that Wong will be working on in his new role will be to lower the smoking rates on college campuses. Although, as a whole smoking is down on college campuses, women smokers as well as high school smokers have increased. "I will do what I can here, except it will be for all the colleges in the state of Massachusetts instead of one college," concurred Wong.

INTERESTED IN MAKING SOME EXTRA MONEY? LOOKING TO GAIN VALUABLE WORK EXPERIENCE?

WHY NOT WORK ON CAMPUS???

STUDENT EMPLOYMENT AT BABSON OFFERS STUDENTS THE CONVENIENCE OF WORKING RIGHT AT "HOME," AS WELL AS THE WONDERFUL OPPORTUNITY TO WORK WITHIN THE BABSON COMMUNITY.

HERE ARE JUST A FEW OF THE AVAILABLE JOBS ON CAMPUS:

Research Assistant - Marketing Department
Building Assistant - Reynolds Campus Center
Community Action Program - Bernon Center
Research Assistant - Alumni
Information Assistant - Library
Mail Clerk - Mail Services
Archives Assistant - Archives
Office Assistant - Alumni
Student Assistant - Math/Science

For further information on student job opportunities at Babson College, please contact the Student Employment Office at ext. 4286. You may also access all available jobs on the Ecampus website.
Letter to the Editor:

Faculty Fellow Studies Aboriginal Art
DIERDRE WOODY

Dierdre Woody B'00 is the Babson College Faculty International Fellow for the 2000-01 year. She is spending her time travelling Australia, studying Aboriginal Art. Graduating seniors interested in applying for this position should contact the International Programs Office for more information. Applications are due by noon on Tuesday, November 21st, 2000. A $20,000 grant is awarded to the student whose proposal shows the greatest passion and feasibility of execution for a year of study in another country.

All the eyes of the world were placed on the Sydney Olympics this past month as the 2000 Olympics were dubbed "the best ever." Hundreds of Aboriginals took part in the opening ceremony to help show the world all the different facets that make the extraordinary land down under. Aboriginal Australians are considered to have the longest continuous cultural traditions on our planet. Through radio-carbon dating archeologists have proven that Aboriginals have inhabited AU for at least 50,000 years. This was found through the testing of cave markings, skeletal remains, and mid-size excavations (areas removed where remains of such tools, firespits, etc. have been found).

For the past 50,000 years, Aboriginals have lived in harmony with their land, believing that they belong to the land, not the land belonging to them. This is quite different from the American Indian who have to supplement their spiritual beliefs. Aboriginals believe that the earth was created as their Spiritual Ancestors came down and walked across the land. Murred mountains, mountains, rivers, lakes, and other geographical features were formed where meetings or significant events took place between Creation Beings.

This creation period is commonly referred to as the Dreamtime or Dreamings. However, this term is misleading because it insinuates an imagination coming from the creator, whereas it comes from the Aboriginal, which is at the core of their religious ideology. Aboriginals use art for several purposes, however they do not make art for the purpose of selling or performing. Their artwork is done for educating the younger generations on the laws and history of the land and their culture. Art is also done in order to connect with their Ancestors, who continue to help today to have much power and influence over the land and its people.

In Aboriginal society, everything has been passed down by word-of-mouth. In this way, art can be considered a part of the cultural identity. The traditional forms of art include both paintings and engravings done on rock surfaces, the bark from trees, one's body, and in the sand. The colors used are black and yellow - often mixed up with sanding to form a dark color that is difficult to be removed. The art is done for educating the younger generations on the laws and history of the land and their culture. Art is also done in order to connect with their Ancestors, who continue to help today to have much power and influence over the land and its people.

The Babson Press

Sociology in the Name of Justice

Micheal Berard

An interesting phenomenon has arisen in our culture. In the name of equality, certain groups of people have become classified as intrinsically different. In the name of ending evil prejudices, we alternatively highlight and ignore differences. Both circumstances are intellectually dishonest and ultimately only perpetuate stereotyping.

Several examples of this exist in our society.

Stereotypes are a malleable tool used to deconstruct preconceived judgments of individuals based on a classification to which they belong. Unfortunately, stereotypes are often misunderstood. As such, it is difficult to challenge and ultimately eliminate.

As an example of this hypocrisy arises in "sensitive issues" arguments - occasions where people are afraid to broach a subject even to reveal wrongly held beliefs.

An example of such a behavior could be found in an article recently published in the Wall Street Journal, entitled "The Race Wars: Do the Whites Want to Be White?" The author, John Beshore, argues that the whites are the real victims of the war on racial equality, and therefore condemned for their close-mindedness.

Or, more constructively, the article could be recognized for what it states. Such a satire attains the educating of certain behaviors with sexual preference as well as attacking the paranoia that many feel at the notion of being sexually identified (or misunderstood).

Not allowing this argument to be presented segregates the argument from mainstream society. This segregation can only have the effect to draw attention to the differences of the group as a whole. This causes those outside of the group to perceive those who are part of that group as a single unit. Vital stereotypical definitions are strengthened.

Conversely, willfully ignoring group common traits is equally bad. Groups often display common characteristics or behaviors. Judging any individual on group standards is wrong, but no more wrong than ignoring a trait simply because it does not conform to a stereotype. It is important to keep in mind that groups often do display common behavioral traits due to immersion in a culture that celebrates those traits. Part of having a "multicultural awareness" is being aware of these beliefs and the likelihood of whole groups to follow these behavioral trends while absolutely not holding an individual up to comparison to such a standard. This distinction is imperative in realizing individual identities.

Only through deconstructing the beliefs that bind people into mass we hope to live in a world that is perceived as a collection of individuals with unique identities rather than a collection of groups.
fault line between being and destruction

DOUGLAS AMMERMAN
OPINIONS EDITOR

As I walked through my dorm this afternoon, something irked me (more than normal, being that living in the Annex has lent itself to a fair share of interesting happenings). Brian Duggan, the area Resident Director, had conspicuously posted for the other residents and I flyers throughout the hallways regarding every incident of dorm damage and our assessed bills.

During the first portion of this semester, we at the Annex witnessed a fair share of destruction within the confines of our tiny universe. Multiple card readers have been broken, about ten windows, the horn attached to the door alarm, and various articles of furniture all fell prey to the dark and sinister hands of unknown midnight assailants.

In some small way, the Annex has abandoned the status of a static entity and entered a state of constant flux, all the while dragging its powerless residents along into a chasm of erratic and chaotic actions.

If you could for a second view Babson as a plain (in a relational sense), then the Annex would most record number of approved drugs to be pulled from the market.

Erecting Ralph Nader for President would make the lives of Americans much better, but that isn't the primary reason you should vote for Nader in the coming election. Because of current campaign financing policies and exclusion by the Republicans and Democrats of third parties from the debates, the ideas of Nader and other public servants never reach the ears of American voters.

It is time to vote for a better America. It is a time to vote for Ralph Nader of the Green Party.

As with any event, Babson has contracted a few chores of destruction, causing a

definitely lie upon a fault that separates our community from a field of irresponsible and unethical behavior.

As occurs within the lithosphere of our own earth, these plates are in constant motion expanding and falling beneath each other.

As destructive-force-of-others is in some ways self-explanatory, destructive-force-of-self brings up a bevy of questions on a philosophical level.

As this aforementioned plain of chaos slips over the Babson community, we (as residents of the Annex) have become lost under this realm and have slumped slowly into the molten mantle of lost consciousness.

For what roots (other than plains of deviantity that ebb and flow in other dimensions) lay at the heart of this problem (destructiveness and wanton disregard for civility) that plagues the Babson community in its entirety?

To sum it up further, the problem at hand needs to be further

ther segregated by the intentions (conscious and unconscious) of the perpetrators.

We see two classifications arise: the being who evidences destructive-force-of-others and the destructive-force-of-self.

Destructiveness-of-others manifests itself in a willful disregard for the rights of others.

Actions linked to destructive-force-of-others include destroying school property, swearing at or taunting others for no reason, or other actions that would place relations between two parties into a "state of war.

As destructive-force-of-other is in some ways self-explanatory, destructive-force-of-self brings up a bevy of questions on a philosophical level.

What are we doing on a conscious level when we binge drink?

Why are college students particularly apt at realizing that getting loaded on a given weekend is their possibility?

Before the age-long enigma surrounding the self-destructive action, the question is if we can be answered, this issue of destructiveness-of-self needs to be concluded.

We can only be right about the choices we make because, as Charlie Brown once put it: "In the book of life, the answers aren't in the back."
PART-TIME RECRUITING ASSISTANT

TAC Engineering Resources is a 31 year old placement firm based in Newton, MA that specializes in identifying and placing elbows of contract/temporary software professionals at hi-tech companies in the Greater Boston area. We are currently looking for some reliable, part-time people to make contact with software engineering professionals in our database for the purpose of updating their availability to begin a new contract assignment. This position involves a combination of phone work, emailing and database documentation. You would receive on-the-job training so no previous experience is required. Applicable skills for this position include attention to detail, self-motivation, a consistently high level of effort, common sense, an ability to communicate effectively with a variety of different personalities, and a good sense of humor! Our office hours are 8:30AM to 8PM Monday through Thursday, 8:30AM to 6PM on Friday and 9AM to Noon on Saturday. Please look at our website: www.taceengineering.com for more information.

SEGMA EXPANDS GAMING SYSTEM TO THE INTERNET

DJ SCHRICKER
STAFF WRITER

Over the last 10 years, video games have expanded to numerous systems. From the original red blocks of the Red Barrell to the newest systems like the Sega Dreamcast, the Sony PlayStation 2 and the new Nintendo 64, there are now more than one million game systems in use.

Sega's latest system, the Dreamcast, has provided eye-popping graphics looking to rival the PS2. The game is being released in both the US and Europe.

The SegaNet service provides a high-speed, online gaming environment for its users. The first 50 hours for all users is free, and after that, each hour of use is $2.95 as a credit card number and a payment for $21.95 a month.

Between the Pipes

Sega officials see this increased interactivity as the best opportunity to grow the gaming world. This is a chance to begin to learn about how people are using the Internet to communicate with each other.

Even if you are not interested in football games, Sega sees this as being a way for you to get involved and use the internet.

Quake 3 Arena, NBA2K, Unreal Tournament, and more are being released with the Dreamcast. The men of Online Racing have all been created to work in the simulated online gaming environment.

Even though everyone is excited about the gaming fans, look forward to the next generation of gaming. The PlayStation 2, the Dreamcast, and Microsoft's X-Box can only further the evolution of gaming as we know it, and more of the games will be available for online purchase.

Government Looks to Block AOL-Time Warner Merger

DJ SCHRICKER
STAFF WRITER

Recent news reports by the Washington Post state that the government is looking to block the merger between AOL and Time Warner Corporation. The reason for the government’s position deals with the issue of control of high-speed Internet access.

In the computer crazy world we live in today, the Justice Department is looking to control the rate at which technology grows, while maintaining free and fair access to all users.

The merger, one of the largest communications deals in history, was expected to close sometime this fall.

AOL has been willing to part with several of its partners in order to make the deal work, including letting go of its operations with German company Germany Telekom. After significant compromises it appears that AOL will be able to close the bag.

The Federal Trade Commission (FTC) has concerns that companies with a monopoly over the high-speed Internet access become too prevalent in today’s society.

America Online’s marketing resources, high customer base, and easy access to financial resources have made it the largest Internet service provider in the United States. This means that Warner currently has much more control over the Internet service, and the Roadrunner service, with AT&T Broadband.

It is very clear that the development of the Internet and its content has increased the necessity for high-speed viable solutions for connectivity. A 56k modem simply won’t do it anymore and more and more service providers are switching to alternative forms of service such as DSL and cable modem service.

One large and centralized supplier of these high-speed services might hinder the development of a dynamic and increasingly competitive market into one with high barriers to entry and high costs passed down to consumers.

FTC officials believe the combination would result in monopolistic pricing and keep out other entrants from this rapidly developing sector of the economy.

There have been suggestions made to allow splitting of telecommunication lines which would allow other companies to offer services together with Time Warner. The solution of allowing sharing is not yet a requirement and it could take time to hammer out the details of such a compromise.

AOL-Time Warner has maintained that it would allow access to its high-speed cable network, but they have not detailed how this would not benefit the government as to how to work with.

Officials have stated that they have two weeks to reach a solution. The FTC has maintained that it is willing to take the negotiations to court to achieve the best settlement possible.

In the world today, the government is looking to achieve free and fair access for all consumers to any technology. The Department of Justice’s case against Microsoft was the first step in the government’s plan to achieve this goal.

The AOL-Time Warner block seems like the government’s second attempt to reinforce the values of a “free market” in society. As what the future holds for AOL’s acquisition remains uncertain, the FTC has until October 27th to approve this deal, and only if the deal is approved will the Fox Corporation get to acquire News Corporation, and the government must not interfere with the way in which it would like. Most of the conglomerates are looking to become prevalent, and this is the first step forward toward the new technological revolution.
Boston Ballet's "La Bayadere" Moves Audience

KEVIN RISNER
STAFF WRITER

One thing that has learned about the Boston Ballet is to always expect the best. At the recent performance of "La Bayadere," performed at the Wang Center for the Arts, the Boston Ballet’s rendition of the iconic ballet was a triumph. The company’s dancers, each chosen to match the mood of the music and the setting in which the dance is performed, did not disappoint. The dancers are all committed to the work they do, so only their best is good enough for the entertainment of the viewer.

You sit in a theatre surrounded by people who love ballet; a sense of excitement is always in the air. "La Bayadere" is a chance to feel this excitement, and to see what the Boston Ballet is all about.

Set in India, "La Bayadere" is a story of love, passion, and devotion. Superb scenery draws the viewer into the dance, placing them in the center of the action. It allows the viewer to participate in the marriage ceremony between Nali and the Prince, a very surreal moment in the dance world.

The dancers pour forth emotions through their movements, silent gestures, and exaggerated facial expressions. Colorful costumes, stirring music, and fluid movements weave seamlessly together in this powerful performance.

A previous knowledge of the plot is not needed, because the Boston Ballet’s performance is expertly directed by the legendary Marguerite Littlefield, and the entire cast is simply stunning.

The event is " serviced by a large group of musicians who, through their experience, have set the standard for what music is capable of being. As many have learned, the ability to blend and weave your way out of problems, call it "thinking outside the box," is the key to your success, and you can be a vital skill in life. However, although somewhat obscure, this was evident in the work of an art, and it was the first time an art form had been produced by Dana Yankee.

Jazz Ensemble and C-Notes Shine at Cabaret

Andrew Boysen
STAFF WRITER

What do you get when you mix romantic wishes and greed with a sappy story line? You get 100 minutes of a weak movie with a few very funny scenes in a movie entitled "Bedazzled." The cast includes Brendan Fraser and the perpetually attractive Elizabeth Hurley. Harold Ramis directed, co-producing and co-writing the movie, having success in the past with similar storylines in movies such as "Caddyshack," "Ground Hog Day," and "Nancy Gymnastics." It appears that my expectations for this movie were too high.

There is a somewhat entertaining film, but a couple of bad mistakes. Basically, Fraser gets seven wishes from the devil, and a lack of chemistry between characters is the main reason why the acting is so poor. However, the film is played by Frances O’Connor. After repeated failures, Fraser realizes that wishes will not win him the heart of his woman, and through a loophole in his contract, he resolves to be. He is released.

Despite the change of heart, the enlightened Fraser is still not successful in his romantic endeavors. This failure does not leave the viewer feeling sympathetic towards Fraser, as you are able to see the lovely Hurley in a more serious role. Unfortunately, the story still ends with a happy ending.

Why did this movie with a generally weak plot make $3,106,526 in the opening weekend? Please write your attention again to exhibit A: Elizabeth Hurley.

This movie worth seeing? Yes, if the alternative is home work or studying, but not if the alternative is watching other quality time with friends.

Of course, you can always talk about the movie, so the best option is going to the show, and moving with your friends during the show. But if that’s still not enough, you can bring along a copy of the 'Bedazzled Free Press.'

On Saturday night a packed, standing room only, crowd gathered at Roger’s Pub to watch the Jazz Ensemble and C-Notes perform a night of fun. The band was not disappointed. The night began with the Jazz Ensemble performing the event, introducing acts, and providing comic interludes. The next group was the C-Notes Jazz Ensemble, a group that has been touring for several years and is a favorite of many people in the Boston area. The C-Notes’ sets always keep the audience on their toes, and their music is always a hit with the crowd.

The night at the Pub provided a fun evening filled with music and entertainment that the Boston community enjoyed and will look forward to in the future.

The Many Reasons Why You Need a Rubber Ducky

BRIAN CULTIP  
Lifestyle Editor

If you were ever a child, and I'm willing to bet that at least 65% of you were, you undoubtedly had some fond memories of growing up. I'm also willing to bet that most of you even had a special play thing that you held close to your heart and never wanted to put down. Some had teddy bears, others had blankets, while some felt content to stick to their thumbs.

I'd now like to explain how necessary it is for everyone on the planet to own a rubber ducky. First off, it has to meet certain ducky requirements: must be rubber (no cheap plastic rip-offs), must have the ability to squeak (how else are you going to communicate?), and must be yellow (except if it's an alien ducky, then it can be purple).

So, if your ducky meets these standard-issue requirements, you'll be able to reap the many benefits of owning such a valued treasure.

Rubber duckies

Made of a valid flotation device. Back in the mid 1970s, when Babson fell victim to countless cases of waterlogged duckies on campus were at an all time high. With a rubber ducky, you can always grab hold of his beak and float to safety.

The only exception is if you have a spare airline seat lying around. Those can also be used as valid flotation devices.

Get a sympathetic friend who will always listen. Boyfriend got you down? Did badly on that last IMC exam? Your rubber ducky will always be there to quietly console you in your time of need.

Observe as he listens intently to every word you have to say. Notice how he never butts in and allows you to express your deepest emotions.

May be used as a handy projectile weapon when compelled to use force. Someone cut you in line at the dining hall? A quick ducky shot to the head ought to make him think twice next time he feels the need to mess with you.

Can help get out those tough to clean food stains. The next time your chalupa gets a little too messy, and you find yourself dabbling in “Ye Quiero” hot sauce, throw ducky in the wash.

When your clothing comes out, you'll be marveled at how stained your shirt will still be, but how utterly spotless ducky remains. It's just plain ducky magic.

May be used as a wonderfully majestic religious idol.

You'll notice how ducky never asks for sacrifices, never forces prayer, and always seems appeased. This is because, as a deity, ducky feels it necessary to be at one with his duckyness, and by no means forces his beliefs on anyone else.

The only exception is if you have a spare airline seat lying around. Those can also be used as valid flotation devices.

This is the way of the Quacker. Rejoice in its mastery.

Can be used as a source of light if previously doused with radioactive material. Never again will you be searching through cluttered drawers and dark closets for batteries that you never seem to find.

Now, in the event of a blackout, rely on ducky to emit a warm, corporeal green glow enabling you to continue to see. Caution: death by radiation may result. Use only as directed.

Can be used as an alternative pick up line at your favorite bar. "What's your sign?" and "You come here often?" seem downright foolish in comparison to "Wanna see my ducky?"

No need to buy her a drink or listen to her babble if she knows you have a ducky back at home. Just make sure you always practice safe dackage, hence the need for the rubber part of the ducky.

So, go out and buy your own special rubber ducky today. Name him, hug him, love him. Just remember to buy him a round every now and then.

"But She Doesn't Really Look Like It"

TRICIA CUBELLIS  
Contributing Editor

Have you ever heard people describe someone by saying, "she doesn't look like it," and wonder just whom they're talking about and what they did that didn't quite fit their image?

I have. A lot. And most of the time, I am that someone they're talking about. I know I look like a savage, wild, somewhat malevolent person in my recent photos. But that's just for show.

Ok, so I may get into a little mischief here and there. From time to time I participate in somewhat devious acts. Yes, occasionally I do rise to the challenge of being the most obnoxious person you could ever hope not to encounter.

But you wouldn't know it by my looks, because apparently, "I don't look like it." I love this statement. I find great amusement in the defending arguments behind this statement such as, "she has such an innocent face," and "she just doesn't look like she would do something like that."

Does that explain anything other than the obvious, which any person with a second grade reasoning could infer? Critical thinking skills are really necessary in this situation.

Not only does this statement amuse me greatly, but I do find a sort of weird satisfaction in knowing that people can be so easily deceived by the sheer looks of someone.

Good to know that I don't look like I would take my mom's car out when I was 14 and smash it into a tree. I sort of like to get a rise out of people when I tell them something like that. I have got you all fooled.

Would you think I would like to get on tables and dance to 'You Shook Me All Night Long' by AC/DC? Do I have the face of someone who would stand on the side of the road waving to random people just because I think it's funny? What about boasting a move in traffic just because I suffer from a severe case of hyperactivity and sit in car for two minutes at a stoplight is just about two minutes too long? What about stealing and robbing out of the car at that very same stoplight? Do I look like the type of person who could pound a pint of cider in six seconds?

Well, let me tell you a little story. I do love to tell stories, whether I look like it or not. One fine weekend, I went to a bar. Yes, even I go to those magical places. And at this bar, I ordered a pint of cider. I drank this cider...in about five minutes. Then I ordered a half pint. That one took about ten seconds. Not too bad, eh?

Then a random man challenged me - he said if I could drink a pint in ten seconds, he would buy me two pints for free. I requested on how to prepare myself. Permission granted.

One hour later, the challenge was on. I negotiated for 12 seconds for the pint, and while random guy was reluctant and insistent on drinking it on his, his compassionate side took over.

So I took my pint, I took a look around me, I took a big swig, and I took one big gulp.

Six seconds. Do I look like that?

Look again.

The Simple Facts on the Most Widespread STD

ASHLEY KEenan  
Contributing Writer

Well, I'm on a roll! Now that I've told you about HPV, I'll quickly slip in another sexually transmitted disease before I get to the good stuff.

So I scared you with the whole thought of Genital Warts, now let me tell you about chlamydia.

Sound gross? Well gross? It's the number one bacterial sexually transmitted disease in America.

The good news is, unlike HPV that is a viral infection, this disease can be cured. A simple treatment with antibiotics is sufficient, however, chlamydia has been nicknamed "the silent disease" because three quarters of the women and half of the men with the disease have no symptoms.

This particular sexually transmitted disease, if left untreated, can cause infertility.

Fortunately, chlamydia can be detected during a simple visit to your doctor, where they can run the appropriate tests (I'm beginning to wonder if I shouldn't start charging a fee to your Gynecologist/Urologists, with all the free PR I'm giving them).

Finally, unlike HPV, condoms are very effective in protecting you against chlamydia. In addition to the URL mentioned above, here are two other sites that can provide you with information on chlamydia, as well as other sexually transmitted diseases: www.cdc.gov/nchsp/idt/chlamydia_facts.htm and www.plannedparenthood.org/STI-SAFESEX/chlamydia.htm.

Make sure to look for this article next week, as I will give you some fun facts about the Baxson College student body.
Top Eleven Creative Halloween Tricks
11. Before retiring to bed, remark to roommate that areas of Forest were once used as a morgue. Just as your roommate awakes the next day, place a sheet over your head and body and extend one foot with a prominent toe-tag from underneath. Prepare for cleanup of roommate's bodily fluids.
10. Replace professor's PowerPoint presentation with slides of you on spring break involved in a wet T-shirt contest.
9. Nail a series of 95 theses to doors in campus residence halls to commemorate October 31st as Reformation Day, not some vestigial pagan holiday. This message was brought to you by the Evangelical Lutheran Church of America and The Lutheran World Federation.
8. Leave an elaborate trail of beer cans across campus that lead to punchholes in Health Services about the dangers of alcoholism.
7. Begin annual tradition of pouring alcohol over the grave of Prohibitionist Roger Babson on Upper Fields.
6. Carry on heated conversation with self about debt vs. equity financing.
5. Paint over Samaritans sign on Rt. 9 to read, "Desperate? Call staff members of The Babson Free Press (781) 239-4229".
4. Replace somebody's regular coffee with Folgers crystals!
3. Switch BMW emblems on cars in Trim Parking Lot with Mercedes emblems.
2. Send phony "Letters" e-mail detailing plans to revert back to the Banyan network (For those uninitiated underclassmen, this prospect is more daunting than anything else conceivable).
1. Switch the Sober Man's ginger ale with cheap beer. Enjoy ensuing hours of entertainment.

Flex Creative Muscle on Halloween
SEAN CARRAHER
MANAGING EDITOR
Halloween's reputation as the holiday of adolescent pranks is well deserved. Images associated with Halloween tomfoolery generally center around peppering neighbors' yards with eggs and flaming sacks of animal excrement. However, I urge those with a sense of tradition to reconsider the value of these options. More creative options are available to you. For instance, I know of a few students for whom rolling one of the world's largest free standing globes down the hill to Reynolds is a personal dream. Future generations may exploit the engineering prowess of students at Olin to finally live out this simple aspiration. However, I urge those with a sense of tradition to reconsider the value of these options. More creative options are available to you.

Wheelers Take Home Second Consecutive Floor Hockey Title

The third seed Wheelers defeated the second seed Chiefs 3-2 to take home their second consecutive intraflurals floor hockey championship. The Softball title in the spring.

The sophomore trio of Brian Manning, David Hughes, and tough guy Derek Lightrubin led the Wheelers throughout the final week of the championship.

Manning, not known for his stick handling or goal scoring ability, was a force on defense and regulating on the opposing team's big forwards.

Hughes, a former JV point guard for Babson Basketball, used his ball control ability along with his height to see over the defense and lead his team's offensive attack.

Derek Lightrubin, who appeared bigger than he really is in his goalie equipment, didn't always make the easy save, but was there when his team needed him.

The game went as expected, filled with lead changes, diving saves, slappers, and a lot of substitutions. The deep Chief squad. Chiefs' goalie, one of the stars of the game, in the loss saved 33 of 37 shots.

Lightrubin was not as flashy as the glove in net, but his team worked with him to get him the victory, nonetheless, as he saved 22 of 25 shots.

Funky to meet in Busy set Finals

In loops action, Funky Bunch, the Dream Team of Fall Intramural Basketball, continued to swing up their competitors and leave them embarrassed and humiliated after each game. The Funky Bunch team consists of 4 former Babson Basketball players, Jeff Needham at the point, Jim Brones' O'Brien at the 2, Mike Miller at the 3, and Doug Greene taking care of the post defense and the offensive 3 point shot.

Funky Bunch has averaged a league high 36 points a game through their first five wins. Funky Bunch defeated the Goat Boys last week 25-9, who earlier in the season almost upset Funky Bunch, but lost in the final minute of overtime. Funky Bunch took the floor with a comfortable lead against the Goat Boys last week.

Women's Volleyball Takes 2nd Place in Tournament

Babson Volleyball started off the most important part of the season last weekend with an easy win over Eastern Nazarene College. The Babson women won 3-1 defeating Eastern Nazarene 15-10, 11-15, 12-9, and 15-12, getting excellent play from a number of players.

Two days later, Babson traveled to UMD for a two-day tourney. In the first game, the Beavers lost to the host team UMD in a hard fought battle, 15-15, 5-15, 15-12, and 12-15. In the second game, Babson played a great game, in a must-win situation. Babson easily defeated UNE in straight sets 15-5, 15-13, and 15-11.

In the semifinal round, the Women faced a much-improved Roger Williams team. Babson held tough against RWU, and won in five sets in a closely played game. The final score was 15-8, 11-15, 15-7, 4-15, and 15-11.

With this victory, Babson moved into the final game, a rematch against UMD. The Women played well, but fell to UMD in four sets, 15-4, 15-13, 4-15, and 8-15. The team played well throughout the tournament, and Alyson Yablonski '03 was named to the invitational all-star team.

Three days later the Babson women traveled to Springfield College. An impressive Springfielnd squad swept the Beavers in straight sets. The final score was 15-1, 15-7, and 15-8.

Babson's next game was against Regis College at home, and the Women came out with a lot of intensity. They dominated the match, winning in straight sets 15-8, 15-10, and 15-4.

There was excellent play from Alyson Yablonski '03, Amy Ellis '01, Stephanie Rogers '03, first-year Erica Yuan, and co-captain Michelle Malone '02.

Two days later the Babson women faced off against Endicott College. In what proved to be a very exciting match, Babson came up just short of victory.

After losing the first two sets the Women came back to tie the match at two sets apiece and then lost the last set. The final score was 5-15, 6-15, 15-10, 5-15, and 11-15. After all of this volleyball action, the Women's record is 9-12, with the post season close at hand.

Come out and support Babson Women's Volleyball during their final three regular season games. On October 23rd they play on WNEC, on the 24th they play their final home game against Wheaton, and the Women close out the season with a trip to MIT.

The Women's Volleyball team plays away at MIT on Saturday before heading into the NEWMAC Tournament on October 31st.

Kanarian Overcomes Injury to Lead K2 to Soccer Victory

Down to the fields down under. There were four soccer games, and the Beavers were looking for number one seed Babson couldn't find six guys to play. Word around the league is that Tavius was a player who could field their own football team with their entire roster, won't be able to hit the long ball. Babson's coach is led by you, yes you guessed it, three baseball players: Patrick Ray, Tim Santor, and Mike Manning.

The game will be more than just a fun game for the Intramural soccer final but Patrick Catterall was actually teammates with Needham and Mike Manning in high school.

Santor has admitted that his squad is not full of speed, that he said are "we all are," Yantz just seemed happy that Springfield was coming back, but he couldn't make a deep J.

Funky Bunch earlier forfeited against Funky Bunch because of their fear of humiliation, but this time it might not be baseball. Funky Bunch was able to see a secret weapon that Funky Bunch discovered for the season, which is an "incredible header in traffic," along with Seth Waterman, who tallied an assist along with 2 goals.

Things almost turned sour minutes into the second half with the score tied 1-1 after Greg Kanarian taken one for the team. The game looked like it would sideline Kanarian for the rest of the season and force his team to play one short on the field.

Kanarian, who was fired up for the contest, knocked off the pain and assisted on Waterman's final goal. He almost scored one himself but missed the empty net on a 2-0 breakaway.
Fall Sports 2000
**Men's Golf Top-Ranked D-III team in New England**

**VIN FRAMULARO**

The Men's Golf team is the top Division III team in New England after an impressive performance in the New England Championships held in Brewster, Massachusetts this past weekend. The team finished seventh out of 48 schools, being beaten only by six Division I schools. The result comes one week after the team won the NEWMAC championships in Holden, Massachusetts.

The team had 5 golfers attain All-NEWMAC at the NEWMAC championships on October 14th, as Mike Kuzara '01, Mike Sexton '01, Jared Meyers '01, Steve Eklund '03, and Brandon Eldredge '04 all finished among the top six performers during the NEWMAC tournament. Mike Kuzara's 78 was named NEWMAC Player of the Year as he shot a 148 for first place, while Eldredge '04 was named Rookie of the Year with a 157. Babson Coach Mike Vassalotti was also given Coach of the Year honors.

On the first day of the New England Championships, the Babson men scored a collective 315. "We were three shots down going into the second day, which made us even more determined to win," said Eldredge '04. The team was able to make up the deficit on a much more difficult course to shoot a 311 on the par 72 Captain's Golf Course. "Not only did we win Division III, but we also beat every Division I team," said Eldredge. Their performance makes them the New England Intercollegiate champions in the fall prior to qualifying for the national tournament.

The team looks forward to the potential for future success this spring. Last year, the team was third at the NEIGA championships in the fall prior to qualifying for the national tournament.

**Women's Soccer Reckons With 3rd Straight Victory**

**VIN FRAMULARO**

The Babson Women's Soccer team has now won four of their last five games heading into the NEWMAC tournament. With a hat-trick performance by captain Katie Ryan '02, the Lady Lions powered past WPi on Saturday for a 2-1 victory. The Babson Women certainly did not disappoint the home fans this parent's weekend as they got out to a 2-0 lead in the first half. A pass from Karyn Grolnic '02 lead to a Katie Ryan '02 goal just shy of 5 minutes into the game to give Babson the early 1-0 advantage. She would then net her second goal off a pass from Charlene Caputo '93, nearly 37 minutes later, giving Babson the 2-0 lead heading into the half.

WPi wasted little time building upon their 2-0 lead in the second half, as they ran away from the Lady Lions. The Babson Women scored three goals, all within a span of two minutes and 29 seconds early in the half. Tara Haverty '02 found the WPi net 5:10 into action off a pass from Meghan Norton '02, as another Norton assist would lead to goal one put by Michele Wiernarsz '01 minute and 14 seconds later.

Haverty '02 would then add her third goal of the game at 52:39, assisted by Amber Benoit '02, to cap off a 5-0 Babson advantage.

WPi would not get a goal with eight minutes remaining in the contest to put them on the board 5-1, avoiding the shutout. Captain Jackie Biro '03 had four saves in the victory as Babson shot out WPi 24 to 9.

The Babson Women's Soccer team now looks to carry their momentum into the NEWMAC tournament. If they win the quarterfinal game against Springfield, they will advance to the semifinals this Saturday, October 28th.

Babson rugby culminated their season this Saturday against the Yale Bulldogs at Yale. Babson lost the game but accomplished their goal.

The Beavers knew they were facing the second best team in New England and hoped to prove they could hold their own against such a powerhouse.

The vicious tackling of senior captain Dan "D-Rod" Rodriguez and fellow senior Bob "Hulk" White helped establish their presence early on.

Following sophomore co-captain John "Caino" Cain's try, he was the Man of the Match for the day and directed the backline, including Craig "Stitch" Hardfield (2 tries), to victory. Having scored 173 points this season, Yale had only three tries to show for the day. It was also the first game the Beavers have had all year.

Other B'rs who shone were Mike "Mighty Mose" Quill, Eli "Too Fast" To Be a Forward Loper, Ryan "Tex" Fuller, and Nick "Hands in the Rock" Kerameris. The killer B's played well and

**Sports Beat**

**The Lowdown on Babson sports**

**Three's Company:** The men's soccer team lost for only the third time this year, dropping 2-0 to Yale Saturday. The game was closely contested until Springfield College added the first goal in the 49th minute of the victory. (Soccer Suffers First Conference Defeat, page 14)

**Field Hockey Shut Out**

After losing to WPi, the field hockey team's second straight loss, Wellesley came back with a vengeance in beating the Babson Field Hockey team 4-0 on Tuesday. The loss came in the first round of the NEWMAC Tournament and ended the season for Babson. This came on the heels of a 1-0 Babson victory over Wellesley last Wednesday afternoon. (WPi Holds Off Women's Field Hockey Team, page 16)

**Rugby Finishes For Fall:** The Yale Bulldogs beat the Babson Bears 29-5 on Saturday afternoon, and the men capped their fall season with a 1-0 record. The loss dropped Babson out of the playoffs for the season. (Men's Rugby Ends Season with Defeat at Yale, page 16)

**Streaking Women Win:** The women's soccer team won their 3rd straight game as Katie Ryan scored her first hat trick of the year. Babson beat WPi 5-0 to stay unbeaten. The streak reached to the quarterfinals of the NEWMAC tournament and will continue into the second round of the NEWMAC for Third Straight victory, page 16)

**Bump, Set, Spike:** The Women's Volleyball team captured second place in the women's volleyball tournament at UMass-Dartmouth. The team came off a tough week in which they had 8 tough matches. (Women's Volleyball Takes 2nd Place in Tournament, page 15)

**End of the Road:** Floor Hockey, 3 on 3 basketball, and Soccer intramural seasons all ended in the past week. The games were hotly contested in all cases and provided fun for all participants. (Intramural Results and Accolades, page 15)

**And the Winner Is:** The men's golf team beat all Division II and III teams at the New England Intercollegiate Golf Association tournament to bring home the Division III New England Championship. The win came on the heels of an overall victory at the NEWMAC tournament where Mike Kuzara won Player of the Year. (Men's Golf Team Wins Division III, page 16)
