Lack of Respect Has RAs And Freshman At Odds
AMBER HESCOCK

Despite some differences in opinion, there seems to be a fairly widespread feeling on campus that the number of write-ups (citations given out by Resident Assistants) has gone up this semester. Although the exact number could not be confirmed, there was an unusually high tally of write-ups listed at the Campus Life office as of Monday, October 20. Although it is difficult to pinpoint the precise reasons for this occurrence, views presented by students, the Campus Life staff, and Ray McKinney, Director of Public Safety, offer plausible explanations and raise some important issues.

Officially, the rules have not changed. "Nothing has changed in terms of our policy," said Director of Campus Life, Tim Mann. The difference must therefore lie in the attitudes held among groups on campus including the student body and Campus Life.

An anonymous student, admitting that he had been written up last year and this semester, expressed his belief that "Their (RAs) definition are stricter than last year with the alcohol policy." There are several explanations for a possible rise in the level of strictness.

RA Jacob Miles explained that Campus Life may have increased its focus on reducing vandalism — which is considered to be a result of drinking. Tightening up enforcement, as well as maintaining more overall order on campus, are goals of the RA department. This is especially true of RA Brown and McKinney who made reference to the many MIT students near DIT involving the death of a student caused by excessive alcohol consumption. "I'd rather be more involved in the safety of it than using the policy end of it...I'd rather have my rounds be making sure things are safe here on campus and if something happened I'd be there," said Brown. McKinney also agrees. "Anybody who kills somebody is going to have a hard time getting out...there is a reason for that," said McKinney.

In recent years, alcohol consumption on campus has increased tremendously. Binge drinking is a relatively new phenomenon with a very new mentality. Mothers Against Drunk Driving (MADD) reports that 17,126 automobile deaths in 1996 were alcohol related. For the first time in seven years, alcohol-related car crashes increased. In 1995, for instance, there were 2,206 deaths, but in 1996, the number rose 9% to 2,313. These numbers might not be alarming, but for those who are in the presence of young people with overindulgence of alcohol and the parents of children killed in this manner who are more caring about what their children do, it is an alarming issue.

A Babson Public Safety Officer issues a parking violation to a student's car, a part from the number of parking violations has decreased and moving violations have increased with new radar equipment.

PUBLICATION GETS UP TO SPEED

JESSICA BURTT

It's Friday night and you can't wait to head out to campus for a good time. You get into your car, roll down the window, and the driver begins increasing in through campus, after all Babson only gives out parking tickets, right?

Babson Public Safety has increased the number of moving violation citations issued while the number of parking violations has decreased. To begin with, according to Public Safety Chief Ray McKinney, in order to successfully "work hard in and hard with" RAs, his department has to work together. "We need the RA's and the security people working together," McKinney said. "It's a shame that the RA's don't get it working together with the Police." McKinney added that, for the most part, officers use Babson tickets, but when alcohol is involved or the driver is "endangering their own life or the life of others," the officers usually exercise their right to use the Massachusetts tickets.

Although speed bumps have been considered by Public Safety and the Student Government Association (SGA) as a deterrent for speeding, they have not been approved yet by the appropriate administrations. The number of parking tickets handed out this year mainly because last year there was a Parking Ticket Enforcer, or "uniformed ci-

villian" who was not a trained officer and whose only job was to sit from parking lot to parking lot ticketing. He has since moved on to train to become a certified officer, and the position has been filled. McKinney, however, conducting interviews and expects position to be filled within the next few weeks.

The money made from tickets, along with money from parking decal tickets, and of duty officers.

STUDENTS SEARCH FOR STRATEGY

JOSPEH C. CONSILIIO III

Roger Babson started Babson College on a track many years ago, but is the College on the same track in that it is that trail diverging, innovating, or stagnating?

In Professor Hyde's M3040 class, otherwise known as Policy Formation, four students looked at the current market and tried to figure out where Babson is going. In a special presentation on Wednesday, the students gave feedback and student of Babson's result. A student at Babson may be headed down a new trail, and its going to be a bumpy ride.

The five business programs that the students analyzed were the University of Michigan, University of Pennsylvania—Wharton, Boston College, Bentley College, and, of course, Babson. Each of these schools has a different core, dependency-based learning environment.

University of Pennsylvania prices itself on its marketing and finance departments, where Babson focuses on its Entrepreneurial Studies (ES) faculty to lead the new generation of entrepreneurs.

Dean of Admissions Charles Nolan called this entrepreneurial leadership, "Not just starting a bad-

Alcohol Use and Abuse

ADAM BERGER

Part One of Two-Part Series

While walking to class Monday morning, I glanced up at the grass area near the Student Union, and a young man was drinking beer from a paper cup. People were casually walking around the area, but no one seemed to notice the man. However, his behavior caught my attention. I wondered if he was the kind of person who drinks regularly or if he was just having a drink at the wrong time.

I was curious about the reasons why people drink alcohol. As I thought about the young man, I realized that I had never really considered the implications of alcohol use and abuse. I wanted to learn more about the issues involved, so I decided to conduct some research.

Alcohol-related crashes, these alarming facts are utterly dreadful. Last year, according to the National Highway Traffic Safety Administration, the number of alcohol-related crashes increased by 5%. Unfortunately, the statistics do not give a clear picture of the extent of the problem. For example, the number of deaths attributed to alcohol-related crashes in 1995 was 2,313, but in 1996, the number increased to 2,318. These numbers might not be alarming, but for people who are involved in alcohol-related crashes, the consequences can be devastating. For example, a young man who was involved in a head-on collision with another car died as a result of alcohol use. His family and friends were devastated by the loss.

In recent years, alcohol consumption on campus has increased tremendously. Binge drinking is a relatively new phenomenon with a very new mentality. Mothers Against Drunk Driving (MADD) reports that 17,126 automobile deaths in 1996 were alcohol related. For the first time in seven years, alcohol-related car crashes increased. In 1995, for instance, there were 2,206 deaths, but in 1996, the number rose 9% to 2,313. USE, ABUSE, AND THE CONSEQUENCES

Continued from Page 1
Alcohol took Krueger's life and a great part of his family's. He changed his family's and the nation-at-large's lives. National news headlines reverbberised with Scott Krueger's name and the events leading to his tragic death. Although many underclass students at South Dakota State University and other college alcohol consumption and its effect on students and society.

A recent study in 1993 by the Continuum staff stated that only one third of tenth-grade student's parents give their children a clean "no use" message about alcohol. It is not necessary for students on the college campus. It becomes a god, an icon of sorts. Sadly, "one of every... college students drinks solely to get drunk" as stated in a Van Dusen & Isaac study in 1993. On average, college students drink five to seven days per week and are drinking tremendously more than in the past. In 1977, only 10% of women drank to get drunk. In 1995, 53% drank to get drunk, nearly quadrupling the number.

Not only do women risk injury and abuse, but women also have potential consequences. 60% of college students who report that an STD were admitedly drunk at the time of infection. In a Continuum staff study of 1993, women seem to be even more likely to have a steady boy for the sure "thrill" of the buzz. Consequently, the risks on campus are unimagined as a group number of students actively drinking.

On a typical weekday between 10 a.m. and 2 p.m., four students were driven drunk (0.88AC) and seven students drove drunk (0.09AC) in seven in six is drunk, endangering not only themselves and the other Drivers, bystanders, other drivers, and law enforcement officials.

National exists the stance of Bahamian college on bone alcohol, un- alcohol enforcement officials are failing in the past. Denna Superior, Associate Professor of Psychology and 199 year employee, states, "There has been no change...Bahamians is much more forthcoming as far as alcohol consumption is concerned. Consequently, the comparison of last month alcohol violations to the same month in past years seems to be heading downward. Superior stated that the legal drinking in registered events in Knight Auditorium specifically seems to be "much more responsible."

As of December 20, 1997, lofts at Babson College will have to conform to the University’s new building codes or be subjected to fines of up to $1,000 per floor.

Earlier this year, the Town of Wellesley Planning Board and Fire Department were alerted to the situation by a student who wanted to know how he could build his loft. Most students just by-pass the paperwork and build their own. In some instances, even the inspectors also examined any room which is in violation of the codes.

Safety violations found during the planning inspection at Babson are reported to the police, under a new law that differs from lofts to dazzling bright. Babson College is an enfron- (Continued from Page 1)

GREENSPAN ROCKS MARKET

SHARON R. KING

The New York Times—The stock and bond markets fell sharply Wednesday, with the Dow Jones industrials down 250 points. The Federal Reserve suggested they should decide if lofts are a long-term will remain low for some time to come.

The reasoning by Alan Greenspan created investors and traders, especially in the interest-rate sensitive bond market.

The New York Times recovered a bit, bonds soured the biggest one- day loss in 25 years. Some observers that investors would continue to drift away from stocks and toward bonds.

In testimony before Congress, Greenspan sharply criticized the labor market situation, saying that many workers could push wages higher and fuel infla- tion, which could make interest rates rise further.

The reasoning by some analysts viewed Greenspan’s comments as a warning that the Federal Reserve will raise interest rates at either its November or December meetings.

They said the Fed chairman was trying to remind investors that the recent declines in interest rates and bonds cannot last forever. Some characterized his remarks as a hint that the Federal Reserve last December, when asked whether a new round of rate cuts was a sign of "irrational exuberance."

However, the Dow Jones industrial average fell as much as 126.72 points, or 2.6 percent, to 4,595.57. The stock market fell more than one percent off of its 83.25 points or 1 percent. The Dow Jones industrial average fell as much as 126.72 points, or 2.6 percent, to 4,595.57. The stock market fell more than one percent off of its 83.25 points or 1 percent.

The S&P 500 index closed at 793.84, down 9.28 points. The Nasdaq composite index, which is more negative to value compared to the Federal Reserve, was without recovery from its immi- (Continued from Page 1)

Deafening Noise & Still No Respect

GARDNER BOULMAI

It starts with a piercing scream, quickly, as if being pulled from a burning bed by your last, half-dead, spinning consciousness, resting from the deafening sound of the alarm clock going off three feet above your head. The pain is so in- tense that your mind has a moment of becoming removed from your body. The fire alarm brings the frigid night in pajamas.

Please get up, everyone. We are supposed to frighten you by singing filling their beds with a violent and heavy force. Please do not allow the people away from the alarm in or- der to get guarantees. An actual sense of being injured by a fire will leave the building. Today, fire alarms are deafened as a severe aspect of a conscious preventative measure. The majority of companies around us are looking for emergency, creative, intelligent, well-balanced individuals.

Will this be the product of their use? We all have to wait and see when they finally go. The noise of the fire alarm is a symptom of being overwhelmed. Don’t get me wrong; there are students out there who think they are smart enough but they have to sacrifice some- one to their pride. It is a sign of the times I see a drop in my GPA. For those who haven’t experienced this, let me tell you I’ll take you out for a drink to celebrate your ability to hear the system. I still pole the idea of deafness.

A Time To Celebrate
MICHAEL BERLINER

Columbus Day approaches, but to the "politically correct" this is no cause for celebration. On the contrary, they view the arrival of Christopher Columbus in 1492 as an occasion to be mourned. They have mourned, they have attacked, and they haveัญpread schools across the country into replacing Columbus Day celebrations with "ethnic diversity" days.

The politically correct view is that Columbus did not discover America, because people had lived here for millions of years. Worse yet, it's claimed that the main legacy of Columbus was his destruction. Columbus is routinely vilified as a symbol of slavery and genocide, and the celebration of his day is seen as a celebration of Hitler and the Holocaust. The attacks on Columbus are ominous, because the actual target is Western civilization. Old Columbus "discovery" America?—yes—in every important respect. This does not mean that there was no human eye had been cast on America before Columbus arrived. It means that Columbus brought an end to the Western civilization, i.e., to the great, scientific civilization of Western Europe. The result, ulti-

mately, was the United States of America. It was Columbus' discov-
er for Western Europe that led to the fall of the Mongols, the period during which this nation was founded—

And so it would seem that opening of America brought the
day that has intensified attacks on Aristotle, Galileo, Newton, and
deep thinkers, writers, and
everyone. The values cut

Inadvertent, Impulsive Brain Damage/Death

PROF. CHARLES B. ROTHMAN

Use, abuse, or addiction to chemicals (alcohol, drugs) have as many as 110,000 people die from accidental, injury and injury and death. Drug deaths range from 100,000 per year in the United States alone. Incidence is repeated yearly (4%) and in a relatively short period of time (2%) and deaths from certain legal/illegal chemicals, can account for an entire person's premature demise.

Babson will be never number one in the food industry if it is convincing in the U.S. News & World Report business school division list. This, in my opinion is a list for "boy league" wannabes approaching the fact of these businesses. These businesses are behind those unrealizable Babson. Babson neither has a home or entire change entire race track. Babson can not have a name move away from the previous category. Now is International School of Commerce or Babson Capitalists Group. After all, college or "university" is simply a traditional vocation or vocation making for a school higher from those above.

Change in name or image can be a lighting of the way to make progress de-rages the entire institution.

"The life you save may be your own" is well known to most people.

when used in excess. The bot-tleneck line compiles as forming real, significant, strong, real, loved ones, friends and a potential promising career in order to attain short term national unity. Can you mirror the adage-short term justification for long term consequences?

"I'm from

"The life you save may be your own" is well known to

**Sagittarius** (Nov. 22-Dec. 21): This is the week to start digging out your hidden talents. Be open to new ideas and possibilities.

**Capricorn** (Dec. 22-Jan. 19): You have the potential to make a significant change in your life this week. Be open to new experiences and ideas.
Backed by a strong online presence, the brewery is gaining popularity among fans of craft beer.

The brewery's website is accessible via www.brew.com, and they offer a wide range of products for delivery to customers.

In conclusion, the brewery is a great addition to the local community, providing excellent beer and fostering a sense of camaraderie among its customers.
We're looking for people who look at this glass and say:

"There's gotta be other glasses of water."

We need people capable of going beyond half-full or half-empty thinking. People who see subtleties. Who are quite frankly bored by easy answers and off-the-shelf solutions.

People who are constantly challenging their own thinking and are thirsty for new ideas and knowledge.

You'll have a degree from a top school. Getting a job won't really be an issue. The question is: which job? Which industry?

You don't want to get locked into one area and then discover three to five years from now that you don't like it. By then you've invested too much.

Andersen Consulting offers you the chance to work on a variety of projects—with clients in a wide range of industries.

We are the leader in helping organizations align their essential components—strategy, technology, process and people—to achieve the best business performance.

What makes that possible is the quality of our people. And the quality of our training. We're known for both.

Because business and technology are ever-changing, we see training as a continuing process.

And our $123-million Center for Professional Education in St. Charles, Illinois, is just one measure of our commitment. We train you for a career—not just a job.

Are you the kind of person we're talking about? The kind of person with an unquenchable desire for challenge and professional growth?

If so, come talk to us. And find out more about a career with Andersen Consulting.

Andersen Consulting

The site reflects the strong growth in the use of the Internet as a career development resource for students and the increasing demand for a technologically sophisticated work force to help them. Many students are using the World Wide Web in their job searches, and the new site Internet that Palme Webber can communicate with them in a manner that is accessible and available through the most sophisticated means. The Web site shapes the financial services industry to make it more accessible and less intimidating. It develops technological solutions to meet the needs of our financial and trading professionals. The Palme Webber EDGE service fits in with this trend.

Launching Your Career provides additional resources to help students and industry professionals find jobs. The service includes a searchable database of job openings, career counseling, and access to Palme Webber EDGE site. The Palme Webber EDGE service is a valuable resource for students and professionals to find career opportunities in the financial services industry.
Arts & Entertainment

Want Some Yardcore? KEVIN BLACK

The long awaited album from the wicked Born Jamairis has been released. It's a festive mix of hip-hop-reggae artists in the music industry.

These fellows have been working hard for several years trying to pass on their unique sound of “Yardcore” to all realms of the industry. Apparently there's been some controversy events and making cameos at events throughout the region, keeping them on the top at that next level. Their new album has been well received by both the hip-hop and reggae charts with an explosion.

Their sound is described as “Yardcore,” brought themselves and others to a new level of genre in the hip-hop and reggae music. With its heavy bass and beat, the reggae sound resonates throughout. The album is released on Friday, October 13, 2017.

It includes various artists on their album, with them to share their music. Some include Mad Lion, Head, Sleepy Won, and Merci. With these artists on the classic, the album jumps up from mediocrity to superstardom.

Songs to keep an eye on: "Yardcore," "Get Up," "Roll My World," and "Superstar." If you like to dance, then this is the CD for you. It's a party album and all around entertaining. Come enjoy the show. On Friday, October 13, 2017, and Friday, October 20, 2017.

NOTE: On Saturday, October 14th the 10th annual Harvest Ball will conclude Sunday afternoon. Details on Sunday’s activities will be coming later.

CAR MINUTES 10/06/97

CAB would like to thank all of those who attended the Kentucky Club on Friday night. The Club was a success. We hope everyone enjoyed the excellent dinner and the special entertainment. The Club will be a Frigate Night held on the next three weeks, so start planning your costume for the party on Friday, October 13, 1997.

Any CAB members interested in attending the National Association of Campus Activites seminar on November 10th should contact CAB at 6:00-18:30 Monday, October 13.

Rocketman CORY ACKERMAN

Houston—you've got another problem! Jane Fonda, John Travolta, and John Belushi are all gunning for your attention. They're making their way to the Red Planet in search of a long-lost civilization. But when NASA finds out it needs one astronaut, after all, the flight team canvas protests are ready for action. The lessees only offer two other choices: either the ship survives in the night or in the war, the navigational computer, astro- navigation computer, is turned off. The ship's flight computer is turned off by Blake Boyd, who has never flown a spaceship before, but is ready for acute motion sickness. The second is turned off by Harold Williams, the ingenious, pre-calculating designer of the ship. The third is turned off by General Freedom, who has got to outer space was a kid and they can't use it. In addition, the Born Jamairis include other famous artists on their album who have assisted them with their music. Some artists include Mad Lion, Head, Sleepy Won, and Merci. With these artists on the classic, the album jumps up from mediocrity to superstardom.

As far as your green are concerned, the experience will be similar to the basketball world on the streets which is similar to the theme of the film. People are going to love the back and forth of the sound track. Method Man bands us with a line like: "I see brochures clattering with guns in the park." People are going to enjoy the different in the streets and in the NBA. The basketball game is using interactive recreation game balance the basketball game and it will understand the features of the basketball player as they insert the way that basketballs are played. High and low moments which dictate the life of not only a ball player, but anybody dealing with the harsh realities of living in the world today.

In addition to the lyrics helping use visualise the life of a street ball player, the beats take our mind and body to a new spectrum. The beats follow the mood of the artist as well as the listener. They are full of hard screech drums and a deep bass as well as the emotional beats to add to those same sounds. The best and most exciting tracks are "Won on War, "A Child Behind the Mirror," "Traveling in Foreign Land," "Las Angeles Times," and "Feel the Music." The lyrics are both conscious and mindless lyrics, then this soundtrack is worth purchasing.

Saturday October 14, 2017, 10:00 PM. Soul in the Hole is burning up the charts with their new album.

ROME AND JULEI OPEN BOSTON BALLETS 1997-1998 SEASON

D'METRICE HOLMES

Shakespeare’s masterful tale of star-crossed lovers in Verona will be staged in Boston, beginning October 25, 1997, at the Wang Center, 270 Tremont Street, Boston. Shakespeare in the Park will be presented in the free and open atmosphere. For Shakespeare, the audience becomes the actors. In a sense, the audience, forgotten their lovers because of love again tragically ripped asunder. The city of Verona is stunningly recreated in the breathtaking. Renaissance scenery of artist Alain Vaes. This famous love story, Shakespeare’s masterpiece, tells the tale of ill-fated lovers caught in a web of hatred between the warring Capulet and Montague families in 14th century Verona. It is filled with passion, power, and tragic pride. Shakespeare’s 1594 verse is often known as the most difficult to perform and much of the verse was performed in Venice as early as 1789. The lighting used is accompanied by a recorded score, written in 1934, and premiered in Brazil, Czernostocka in 1938. The Kirov Ballet first performed the full-length ballet in 1949, with Galina Lasnova and Konstantin Sergeyev in the lead roles. In 1955, all set to the Prokofiev score, including those of the Russian author, Alexander Pushkin, and the French poet, Charles de la Bédoyère's 1844 version for Boston Ballet. Set to Prokofiev’s passionate score, this haunting production will feature world premiere choreography by Pennsylvania Dance Theater. The ballet received its ballet training from Richard Chamberlain and Barbara Young. A performance he danced with Amiloff and in the Broadway revivals of "West Side Story" and "Brigadoon." Mr. Peilig holds a degree in cellular biology from Columbia University. The Boston Herald described his work as "dramatically cohesive and it is visually compelling."

Daniel Pelig was appointed resident choreographer for Boston Ballet in 1993. He has created the critically acclaimed "The Princess and the Pea," "Nine Lives of a Dream," "Shades of Love," "Passage," and "Flights & Fancy" for the Company. He won the gold medal at the third Boston International Choreography Competition in 1994 for his ballet "Cantabile." He has created pieces for numerous companies including Jeffrey Pil, Julliard Dance Ensemble, American Dance Festival, New Ballet, and Central Pennsylvania Youth Ballet. Mr. Pelig's talent extended to choreography for opera and theatre as well. "Salome" and "Aida" for the Santa Fe Opera; he created the internationally acclaimed "Salome," and the world premiere of "Modern Palmiers." Mr. Pelig's work includes "Salome" and "Aida" at the Huntington Theatre, "The Woman Warrior" at the Alhambra-at-the-Doolittle, "Kurt Weill's "Four Days in New York," and "Peer Pan" at the Papermill Playhouse. Ticket prices for Romeo and Juliet range from $75 to $125. Tickets are valid on Tuesday, Wednesday, Thursday, Friday, and Saturday evenings, and at 12:50 - $64 for other performances. Student Rush tickets are available one hour prior to curtain, subject to availability, $25.00 per ticket. Restoration fee. Tickets can be purchased by phone at 617-491-BUNNY or at TIXMASTER at 953-ARTS. Tickets are available by calling (617) 491-4900, ext. 342.

Save time and money by attending the nation's premier environmental career conference. Now does attendees have access to a one-stop shop for career information, career guidance, resume tips, and more. The conference will be held at all in one weekend. The Environmental Career Conference (ECC) is the host of the 1997 National Environmental Career Conference (NECC) summit on October 24th and 25th at the Westin Hotel in Concord, MA. ECO is a national nonprofit that has developed environmental professionals for twenty-five years.

This year, the NECC will draw more than 5,000 college students, career advisors and current environmental professionals. The event will feature a variety of lectures, panel discussions, workshops, field trips and networking opportunities. The conference will also feature a unique Career Networking Day on Saturday, October 24th, where participants will meet environmental career opportunity representatives from industry, government and non-profit organizations.

The event will also feature a series of workshops and roundtable discussions facilitated by current professionals from all over the country, providing students the opportunity to ask questions and obtain information on an individual basis. In addition to these exciting events, a job fair will take place on Saturday, October 24. For more information on the NECC, or to register for the Networking Day, visit the NECC website at HYPERLINK http://www.ecolop.nih.gov or call 617-426-4415.
Dare to be Heard

To the crazy ones. The misfits. The rebels. The troublemakers. The round pegs in the square holes. The ones who see things differently. They’re not fond of rules. And they have no respect for the status quo. You can praise them, disagree with them, quote them, disbelieve them, glorify them or vilify them. About the only thing you can’t do is ignore them. Because they change things. They invent. They imagine. They heal. They explore. They create. They inspire. They push the human race forward. Maybe they have to be crazy. How else can you stare at an empty canvas and see a work of art? Or sit in silence and hear a song that’s never been written? Or gaze at a red planet and see a laboratory on wheels?

The Babson Free Press

More Than Just A Newspaper. It's A Way of Life.
As a leader in software consulting, Keane is positioned for a powerful future.

Established in 1965, Keane is a nationally recognized leader in the software services industry and is positioned for a powerful future. To position yourself, consider a career with us. All entry-level consultants receive company-paid software development training. Held at our Corporate office in Boston, Massachusetts, the intensive, team-oriented training includes both technical and management sections, as well as instruction in Keane's structured methodology for project management.

Upon successful completion of the program, graduates join one of our 40 branch offices and provide software consulting support to an area client.

Opportunities are available nationwide, including positions in Southern California, Northern New Hampshire and Maine.

To be considered for employment, candidates must have a Bachelor's degree and be bright, articulate, and well-rounded. A C.P.A. or MIS or Computer Science degree is preferred but not required. All majors are welcome to apply. Keane offers competitive salaries and benefits including ongoing company-paid technical training, tuition reimbursement, paid vacations/holidays, health insurances, and comprehensive savings and investment plans —including a company-matched 401(k) savings plan and stock purchase options. Visit our home page at www.keane.com to learn more about us.

Keane will be holding an Information Session on Tuesday, October 14, in Timken Room 207 from 6:30 to 7:30 p.m. and position yourself for a powerful future.

If you miss, send a resume to our Corporate office: Keane, Inc., Attn: Dept. 601A4670, Ten City Square, Norwalk, CT 06855. Phone: (203) 854-7466, Ext. 2813; Fax: 1-800-544-0157, Attn: Dept. 601A4670.

DOMINO'S PIZZA QUESTION

Which pitcher has the most career strikeouts in a League Championship Series?

The first three callers with the correct answer wins a medium one-topping pizza and beverage compliments of Bannockeba, Willard, NY. To win, call Prem at extension 9896 after 7:00 P.M. Good Luck!
BUSY BEAVERS HAVE SUCCESSFUL JAMBOREE

PREM ATHIAL

In the third annual Men's La
crosse Fall Ball Jamboree, held on
the Lower Fields last Sunday, the
Beavers finished four matches with a
2-2-2 record.

Five hundred spectators wit
tessed the Beavers play four games
each lasting 45 minutes. In the first
game, the Beavers prevailed 7-5
over Holy Cross, a Division I team.
In the second game, the Beavers
ended up with a win, 22-13, over
Boston. The Beavers lost their third
game, 3-0 to Marist, but came back
with a huge 7-5 victory over arch
rival Bentley College.

The Beavers had a powerful and
diverse scoring attack. Goals were
scored by senior Mike Papay, Tim
Dyer, John Nash, Chad Raitis, Jeff
O'Brien, and junior Don Kanode.
Other goals were tallied by Brad
Tela and Jason Popp (both sopho
mores) and freshmen Peter Clark,
Chris Doyle, Chris Darmon, and
Mike Welch.

The mid-field play was outstand
ing, highlighted by constant pres
sure by Beaver players on the en
emies. Standout performances came
from Jorge Perez, Dusty Kanode, Jame
Tlow, and Scott Hoffman.

The defense played impressively
in all games as they applied intimadat
ing pressure and tenacity on ground
balls, and solid fundamen
tal defense. The group was led by
seniors Chad Iaccia, Spencer
Brenette, and Brian Fitzgerald.
Other standout performances came
from senior Kyle Swazy and fresh
men Dan McCall and Paul
campbell.

Shanahan said, "It's a long season.
This was just the sixth round. Last
year there was a team that was 7-1
at [Washington] that didn't make the
playoffs.

If there is anything positive that
the New England Patriots can take
out of this game, it is that they were
not full strength. If any Patriots fans
are looking for excuses, here they are:
Willie McInest and Terry Glenn.
McInest couldn't play due to in
jury, while Terry Glenn was playing
half-strength. The Patriots will use
this game as a learning experience.

You can see the frustration sink
in of the loss to Denver as Drew Bledsoe
painfully removes his helmet. Denver
won the game 31-13.

With a fractured wrist. Despite a
tremendous performance by the
beaver sweepers, Providence would
score one more time and convert,
making the final score of this well
fought game 1-22.

The 8-side match started in the
same manner, with the Providence
forwards coming on strong. The
game would, however, belong to
Buckley, as rookies such as
"Gravy" Gravley, who also played
A-game, proved that the
Buckley forwards were prepared.
After the 4-4 tie, the team, especially
captain Mike Shanaahn, stuck with
the theme. "It's key."

"Let's keep this in perspective,"
After a strong first half of play, Rabson needed a rest. Coach Jindra took this time to develop the strategy for the second half. After capturing a victory in the game, the team seemed to appear much better.

Lady Bears Push Wellesley to Brink

The game started out as a more sophisticated game. There was no real flow; both teams were trying to establish control and play "their game." However, Rabson's dynamic duo, Pauli and Barboni, were more than ready to establish their presence and create opportunities to put a goal on the board, even though Rabson's team was taking control, one could tell that the defense was on the alert.

In the first five minutes, Rabson had two corner kick opportunities. Neither went in, but with the right bounce, anything could happen.

When watching soccer, you get a feel for the team and the game. The team you are watching is generally made up of a forward, a midfielder, a fullback (usually a defender), and a goalkeeper. In this game, we see a midfielder who plays her position well and understands the game.

Back to the game: the reference missed a big call in the box. There was a hand ball by a Wellesley player that should have resulted in a penalty kick. Coach Dinsmore pointed to the point that the line judge was standing ready to give her a yellow card. The defense did an excellent job of holding Wellesley at bay. However, on a��pase, a goal was scored. Rabson dodged a bullet and then turned it into a fight. They dictated the pace and were the dominant team for the rest of the game.

HOME MEET ASUCCESS

Kirsten Emery

Before I go into detail about how the meet went for the runners, I just want to thank everyone who supported the Cross Country team by coming to the meet on Saturday. Hopefully, once we get our pictures developed, we'll have something more recent than a two-year-old picture of an alum.

As everyone knows, Cross Country is one of those sports that is 95% mental and about 5% physical. It takes a lot of mental strength to actually run three miles or five miles on a hilly course. It is because of all our hard work for so this season that we can run as well as we do.

On October 11, Portugal plays Northern Ireland in World Qualifying action. Portugal's only chance to earn the World Cup is by having the best two-bagger in the game. Meanwhile, the Orlovs are the team to beat. Unlike any other team in this region, the Orlovs can beat you from all angles. Republicans and Democrats alike call the Orlovs the best team in the world.

On Monday, the Babson Lady Bears won their third match of the season. It was their second in a row. In singles play, #1 Kelly Steele defeated #2, the first two sets, but the Lady Bears suffered a loss in the third, 6-1, 6-4, 6-2. In doubles play, the #1 combo of Kelly Steele and Julia Kelting fell to Pam Jackson and Celeste McGinn of Salem State, 6-4, 6-2.

For the second half, the Lady Bears continued to control the game and win. After the rain, the Lady Bears showed their mettle. The Lady Bears played hard and had a great finish, which was good enough for 6th place. Overall, they finished out of 20 scoring teams.

On Monday, the Babson Lady Bears won their third match of the season. It was their second in a row. In singles play, #1 Kelly Steele defeated #2, the first two sets, but the Lady Bears suffered a loss in the third, 6-1, 6-4, 6-2. In doubles play, the #1 combo of Kelly Steele and Julia Kelting fell to Pam Jackson and Celeste McGinn of Salem State, 6-4, 6-2.

For the second half, the Lady Bears continued to control the game and win. After the rain, the Lady Bears showed their mettle. The Lady Bears played hard and had a great finish, which was good enough for 6th place. Overall, they finished out of 20 scoring teams.
